The New Sovereignty:

The New Sovereignty Abram Chayes, Antonia Handler Chayes, 2009-07-01 States resort to regulatory agreements to address problems as disparate as nuclear proliferation international trade species destruction and intellectual property while threatening military or economic sanctions in order to deter noncompliance This book argues that this approach is misconceived and proposes a new model of treaty compliance

International law; definition of States; recognition of States; sovereignty; territorial limits of national jurisdiction John Bassett Moore, 1906

Indigenous Peoples and Constitutional Reform in Australia Bede Harris, 2023-12-01 This book examines whether Australia's constitution should be reformed so as to enable the country to fulfil its obligations under the United Nations Declaration on the Rights of Indigenous Peoples which it ratified in 2009 The book surveys the history of the constitutional status of Australia's Indigenous peoples from the time of colonisation through to the current debate on Indigenous constitutional recognition However it argues that the term Indigenous constitutional recognition implying that mere acknowledgement of the existence of Indigenous peoples is sufficient to meet their legitimate expectations misrepresents the nature of the project the country needs to engage in The book argues that Australia should instead embark upon a reform programme directed towards substantive and not merely symbolic constitutional change It argues that only by the inclusion in the constitution of enforceable constitutional rights can the power imbalance between Indigenous Australians and the rest of society be addressed Taking a comparative approach and drawing upon the experience of other jurisdictions the book proposes a comprehensive constitutional reform programme and includes the text of constitutional amendments designed to achieve the realisation of the rights of Australia's Indigenous peoples It ends with a call to improve the standard of civics education so as to overcome voter apprehension towards constitutional change

Sovereignty and Jurisdiction in Airspace and Outer Space Gbenga Oduntan, 2011-09-12 Sovereignty and jurisdiction are legal doctrines of a complex nature which have been subject to differing interpretations by scholars in legal literature The tridimensionality of state territory recognised under customary international law subsists until the present but there are other territories that do not or cannot belong to any state or political entity which also must be accounted for in legal theory The issues surrounding sovereignty and jurisdiction are likely to become ever more pressing as globalisation growing pressure on resources and the need for energy and national security become acute and the resolution of special delimitation disputes seems likely to become a vital question in the twenty first century As a result of the fast pace of technological developments in air and space activities and the massive increases in air transportation satellite communications and space exploration the need for scholars and practitioners to sharpen their appreciation of the legal and political issues becomes crucial This book will focus primarily on the issues of sovereignty jurisdiction and control in airspace and outer space and their effects on public and private activities but it will also look at related issues pertaining to the Seas and Antarctica Commercial exploitation resource control and the international regime

regulating contractual obligations in relation to transportation of goods and services over all forms of territory will be examined to the extent that they are necessary to explain jurisdictional rights and duties over territory Older problems of international law such as crimes in the air and airspace trespass are treated along with newer developments such as space tourism as well as growing demand for private ownership and involvement in outer space exploitation The book goes on to consider the distinction between airspace and outer space and puts forward legal criteria which would allow for the resolution of the spatial delimitation dispute These criteria would determine where in spatial terms the exclusive sovereignty of airspace ends and where outer space the province of all mankind begins and contribute to the jurisprudence of territorial sovereignty and jurisdiction

"Whom Can We Trust Now?" Brian F. Carso (Jr.),2006-01-01 The ancient crime of treason posed legal political and intellectual problems for the United States from its conception through the Civil War Using an interdisciplinary approach historian and lawyer Brian F Carso Jr demonstrates that although treason law was conflicted and awkward the broader idea of treason gave recognizable shape to abstract ideas of loyalty betrayal allegiance and political obligation in a young democratic republic

Risk and Hierarchy in International Society W. Clapton,2014-07-11 The English School of International Relations has traditionally maintained that international society cannot accommodate hierarchical relationships between states This book employs a unique theoretical and conceptual approach challenging this view and arguing that hierarchies are formed on Western states need to manage globalised risks
