Mark C. Jerng

The New World Making Of The Past:

Worldmaking Spenser Patrick Cheney, Lauren Silberman, 2014-07-15 *Worldmaking Spenser* reexamines the role of Spenser's work in English history and highlights the richness and complexity of his understanding of place. The volume centers on the idea that complex and allusive literary works such as *The Faerie Queene* must be read in the context of the cultural, literary, political, economic, and ideological forces at play in the highly allegorical poem. The authors define Spenser as the maker of poetic worlds of the Elizabethan world and of the modern world. The essays look at Spenser from three distinct vantage points. The contributors explore his literary origins in classical, medieval, and Renaissance continental writings and his influences on sixteenth-century culture. Spenser also had a great impact on later literary figures including Lady Mary Wroth and Aemilia Lanyer, two of the seventeenth century's most important writers. The authors address the full range of Spenser's work, both long and short poetry as well as prose. The essays unequivocally demonstrate that Spenser occupies a substantial place in a seminal era in English history and European culture.

Worldmaking Tom Clark, Emily Finlay, Philippa Kelly, 2017-01-19 In 1978 Nelson Goodman explored the relation of worlds to language and literature, formulating the term *worldmaking* to suggest that many other worlds can as plausibly exist as the world we know right now. We cannot catch or know the world as such; all we can catch are the world versions, descriptions, views, or workings of the world that are expressed in symbolic systems: words, music, dancing, visual representations. Over the twenty-five years since, then, creative works have played a crucial role in realigning, reshaping, and renegotiating our understandings of how worlds can be made and preserved in the face of globalizing trends. The volume is divided into three sections, each engaging with worlds as malleable constructs. Central to all of the contributions is the question: how can we understand the relationships between natural, political, cultural, fictional, literary, linguistic, and virtual worlds, and why does this matter?

Racial Worldmaking Mark C. Jerng, 2017-11-07 When does racial description become racism? Critical race studies has not come up with good answers to this question because it has overemphasized the visibility of race. According to dominant theories of racial formation, we see race on bodies and persons and then link those perceptions to unjust practices of racial inequality. *Racial Worldmaking* argues that we do not just see race. We are taught when, where, and how to notice race by a set of narrative and interpretive strategies. These strategies are named *racial worldmaking* because they get us to notice race not just at the level of the biological representation of bodies or the social categorization of persons. Rather, they get us to embed race into our expectations for how the world operates. As Mark C. Jerng shows us, these strategies find their most powerful expression in popular genre fiction: science fiction, romance, and fantasy. Taking up the work of H. G. Wells, Margaret Mitchell, Samuel Delany, Philip K. Dick, and others, *Racial Worldmaking* rethinks racial formation in relation to both African American and Asian American studies, as well as how scholars have addressed the relationships between literary representation and racial ideology. In doing so, it engages questions central to our current moment: In what ways do we participate in racist
