The Of Canadian Fishes:

Freshwater Fishes of Canada William Beverley Scott, Edwin John Crossman, 1973 The Fisheries Research Board is proud to present this volume a tribute to the cooperation between the government agency that initiated and supported the work and the research organization that carried it out It is the hope of the authors that this text will perform a useful service by highlighting the lack of information on many aspects of the biology of many Canadian fish species Particularly glaring is our ignorance of the basic life history of many common species Synopsis of the Parasites of Fishes of Canada T. E.

McDonald, L. Margolis, National Research Council Canada, Pacific Biological Station, 1995 Information on the parasites of Canadian fishes published between the years 1978 and 1993 inclusive is assembled as Parasite Host and Host Parasite lists The 925 named species of parasites are reported on 292 species of Canadian fishes The Parasite Host list is organized on a taxonomic basis and identifies for each species its habitat freshwater marine or brackish site of occurrence in its host s species host s known geographic distribution within Canadian waters and the published source for each host and locality record The Host Parasite list is organized according to the taxonomy of the hosts and is accompanied by data on the known Canadian distribution of the parasites For both the Parasite Host and Host Parasite lists a Remarks section containing explanatory comments concerning systematics nomenclature and notes on other specific items is included as warranted In addition to listing the cited references as supplementary list of references is included to cover other Canadian literature on fish parasites Marine Fishes of Arctic Canada Brian W.
