Russian Military Thought Gudrun Persson, 2025-11-03 Novel insights into Russian military thought from the Crimean War to the war in Ukraine The development of the Russian military's strategic thought is an understudied and thus misunderstood subject in the West Strategy in Russia encompasses the broader context of foreign and domestic policy as well as the military's ties to the country's leadership The military's strategic thought is closely linked to Russia's existence as a state and explains patterns of Russian confrontation In *Russian Military Thought* the renowned scholar Gudrun Persson offers novel insights into Russian military thought on doctrine and strategy from the Crimean War to Russia's full scale invasion of Ukraine Persson dismantles the simplistic notion that Russian military thought is backward instead presenting a deeper analysis of the drivers that influence the changes in Russian military strategy Through archival research based on Russian language sources Persson offers a multidisciplinary perspective drawing on theoretical insights from history and political science that enable her to make a nuanced qualitative analysis This book will be essential reading for practitioners scholars and students who seek to understand the mind set of the current Russian leadership and the constraints that shape Russia's future possibilities

Russia Under Putin Andrew Natsios, 2025-07-08 This book fills a gap in the public's understanding of Putin's Russia by answering the question Is Russia under Putin a revisionist power that seeks to undermine or destroy the existing international order or is it a fragile state with profound dysfunctions The essays in this book argue that Russia is both These essays took a more ominous view of Russia under Putin's leadership at the time they were published a position criticized by some scholars and analysts who saw Putin as a pragmatist

Baxter, 2020-02-17 This collection examines the extent to which nuclear weapons modernization has become a significant point of concern and consideration in international security Recent statements and substantial investments by nuclear weapon possessor states in the upkeep and modernization of their nuclear postures particularly the United States Russia and China illustrate a return of primacy and the salience of nuclear forces in international politics The upgrading of systems the introduction of new capabilities the intermingling of new technologies and the advancement of new strategic models are all

indicative of their elevation in importance and reliance With contributions from leading thinkers in the nuclear weapons domain this book elucidates the global strategic and policy implications such modernization efforts by the above mentioned states will have on international security In unpacking and conceptualizing this developing source of potential in security and tension the collection not only provides a technical context but also frames the likely effects modernization could have on the relations between these nuclear weapon powers and the larger impact upon efforts to curb nuclear weapons both in terms of horizontal and vertical proliferation The chapters have been arranged so as to inform a variety of stakeholders from academics to policy makers by connecting analytical and normative insights and thereby advancing debates pertaining to where nuclear modernization sits as a point of global security consternation in the 21st century
