Definition

Tourism policy is a set of discourses, decisions, and practices driven by governments, sometimes in collaboration with private or social actors, with the intention to achieve diverse objectives related to tourism.

Introduction

Tourism is a relatively young phenomenon which involves the development of a singular and important economic sector. From the very beginning, that economic dimension of tourism has been the main priority for governments, and this has also been reflected in the tourism policy research. In fact it is very common considering tourism policy as a part of the economic policy, but tourism is much more than an economic sector. Tourism is probably one of the most determinant influences on our societies, and it will remain AS a key issue in the future.

The aim of the present text is to contribute to the debate on the nature, content, and instruments of tourism policy by expanding the scientific approaches to this issue and furthering the understanding of public decisions related to tourism.

The analytical perspective of policy analysis is used to propose an operative definition of tourism policy, enumerate the constitutive elements of this type of public action, and describe the instruments available to public decision-makers in order to reach the intended objectives.

Public Policy and the Two States of Kansas H. George Frederickson, 1994 The authors survey general revenue and demographic issues and then analyze the five policy areas: education, corrections, transportation, welfare and health that consume 84.3% of the state budget and that in terms of both cost and controversy rank highest on the state's policy agenda. Emerging from this analysis is the disturbing consensus that Kansas is an increasingly divided state: one urban, younger and wealthier; the other rural, older and poorer

Tourism Analysis, 1997

Tourism and Sustainability Mike Stabler, 1997 Tourism is at the forefront of the debate on development versus sustainability. The challenge facing the industry is how to translate principles into practice and to attain a balance between the objectives of tourism development and the long-term conservation of physical, ecological and sociocultural environments. This book addresses these issues particularly from economic, ethical and environmental perspectives. It has been developed from selected papers presented at a conference held at Newton Rigg College, Cumbria, UK in April 1996. It is divided into four parts: addressing concepts, theories and methodological issues; the tourism industry's promotion of sustainable tourism; minimising environmental impact by means of alternative forms of tourism; and policy implications. The book includes a wide range of case studies and destinations where tourism is rapidly developing in fragile environments including Belize, Crete, Goa, the English Lake District, Madagascar, Malaysia, the Seychelles and Spain. It represents important reading for both undergraduate and postgraduate students, research workers and tourism industry practitioners, whether from the standpoint of geography, sociology, economics, management and marketing or planning.
