ABSTRACT

This paper proposes an approach to the responsible adoption of generative AI in higher education, employing a “points to consider” approach that is sensitive to the goals, values, and structural features of higher education. Higher education’s ethos of collaborative faculty governance, pedagogical and research goals, and embrace of academic freedom conflict, the paper argues, with centralized top-down approaches to governing AI that are common in the private sector. The paper is based on a semester-long effort at the University of Pittsburgh which gathered and organized perspectives on generative AI in higher education through a collaborative, iterative, interdisciplinary process that included recurring group discussions, three standalone focus groups, and an informal survey. The paper presents insights drawn from this effort—that give rise to the “points to consider” approach the paper develops. These insights include the benefits and risks of potential uses of generative AI in higher education, as well as barriers to its adoption, and culminate in the six normative points to consider when adopting and governing generative AI in institutions of higher education.

1 INTRODUCTION

Over the last year, generative AI (GenAI) took academia by storm. The technology deeply impacts higher education on multiple levels,

from the practicalities of day-to-day work to the ideals the sector seeks to promote [e.g., 24, 34, 76]. Given the magnitude of the current and potential future impacts of GenAI on higher education, institutions of higher education (IHEs) are pressed to decide how to approach the adoption of GenAI, and to make these decisions sooner rather than later.

With that in mind, many seek to better understand how GenAI impacts higher education and how to use and govern it responsibly in this context. Researchers often survey the perspectives of students, faculty, staff, and administrators, typically trying to understand how GenAI tools are used and key concerns regarding their use [e.g., 12, 14, 15, 19, 60, 65, 66]. Others conduct focus groups with students and faculty to explore the same questions, albeit less frequently [e.g., 42, 61]. Yet others conduct desk analyses [e.g., 15, 76] or articulate their own views [e.g., 2, 69, 72, 73].

This paper presents insights and points to consider about GenAI in higher education arising from a semester-long effort at the University of Pittsburgh which included a semester-long semi-structured group discussion (29 participants), three standalone focus groups (19 participants overall), and an informal survey (144 respondents). Overall, the effort gathered and organized rich and in-depth perspectives drawn from individuals, particularly faculty members, working in the humanities, arts, sciences, social sciences, health sciences, and professional schools. Section 2 describes the effort itself in more detail.

Section 3 distills reasons for IHEs to adopt GenAI and barriers to adoption. In brief, the reasons for adoption point out that adoption is pivotal for the promotion of the goals and values of IHEs and their economic well-being. One challenge is the low faculty familiarity with both GenAI tools and their potential benefits and risks. Another challenge is the potential for the integration of GenAI to over-burden faculty in various disciplines.

Section 4 presents GenAI use cases, benefits, and risks participants identified. These are especially valuable given the challenge of low familiarity, and they are complementary to the identification of uses, benefits, and risks articulated from other perspectives, such as intergovernmental agencies [74, 75] and students [12]. It also presents ideas for GenAI-related assignments that emerged in the focus groups. These include assignments that require the use of GenAI and assignments that decrease the potential for cheating using GenAI.

Section 5 articulates points to consider for making decisions about GenAI in higher education, including decisions about where policy is needed, what to include in policies, and guidance for individual decisions regarding use of GenAI tools. It begins by examining the “top-down” approach taken by many private sector

Critical Perspectives on the Responsibility to Protect Philip Cunliffe, 2011-03-31 This edited volume critically examines the widely supported doctrine of the Responsibility to Protect and investigates the claim that it embodies progressive values in international politics Since the United Nations World Summit of 2005 a remarkable consensus has emerged in support of the doctrine of the responsibility to protect R2P the idea that states and the international community bear a joint duty to protect peoples around the world from mass atrocities While there has been plenty of discussion over how this doctrine can best be implemented there has been no systematic criticism of the principles underlying R2P This volume is the first critically to interrogate both the theoretical principles and the policy consequences of this doctrine The authors in this collection argue that the doctrine of R2P does not in fact embody progressive values and they explore the possibility that the R2P may undermine political accountability within states and international peace between them This volume not only advances a novel set of arguments but will also spur debate by offering views that are seldom heard in discussions of R2P The aim of the volume is to bring a range of criticisms to bear from a variety of disciplinary perspectives including international law political science IR theory and security studies This book will be of much interest to students of the Responsibility to Protect humanitarian intervention human security critical security studies and IR in general **Catalog of Copyright Entries.**

Legal Perspectives on Corporate Social Responsibility Jeehye You, 2015-07-17 This book offers readers a comprehensive and in depth legal analysis of corporate social responsibility CSR by examining the theoretical foundations of corporate governance and its legal mechanism in the United States and South Korea Moreover it proposes legislative blueprint for establishing the legal frameworks that might serve to legitimize and effectively implement CSR in general Reflecting the zeitgeist of improved corporate accountability and transparency the ongoing movement to enhance CSR has permeated entire sectors of society the world over Despite the apparent ubiquity of CSR the corporate laws of many countries remain relatively silent on the issue omitting to include any explicit provision governing the concept Partly in response to this lack of legislation Korean corporate scholars for example have attempted to introduce American legal theories systems and laws on CSR into Korea Yet traditional Korean jurisprudence provides no defining foundation for CSR indeed the prevailing view in jurisprudence and scholarship passively resists instituting corporate responsibility into the law In response to this jurisprudential and academic shortcoming and as an example for other countries this book provides a comprehensive guide to the relevant legislation and theory on CSR in Korean corporate law by employing a comparative study of the relevant American theories and laws Proceeding from this analysis the book then puts forward a legislative blueprint for establishing a foundation to legitimize and effectively implement CSR

New Perspectives on Corporate Social Responsibility Linda O'Riordan, Piotr Zmuda, Stefan Heinemann, 2015-04-14 Providing a timely contribution to the ongoing questions surrounding topics which are by definition subject to varying stakeholder interpretations this book addresses the missing link between theoretical CSR concepts and everyday management practice It acts as a guide to awaken managers to the advantages of adopting a CSR mindset when developing sustainable business strategies The book consists of three parts 1 A theoretical realm which establishes the key concepts and rationale for the adoption of a sustainable CSR approach 2 A practical realm which addresses putting CSR and sustainability into business practice 3 An educational realm which proposes how to incorporate the concepts into teaching and training
