*Toward Transformation in Social Knowledge* K. J. Gergen, 2012-12-06 This century has been characterized by a strong and pervasive belief in certainty through science. It is a belief that has been nurtured by philosophers, scientists, and governing bodies alike. And where vocal reassurance has failed to convince, modern technology has more than compensated. It has in effect been a century in at least to be making significant headway toward objective, which humankind seemed and enduring truth. Yet as the century winds toward its conclusion, this optimistic belief has begun to confront a challenging array of attacks. Widespread signals of concern are increasingly evident, and in the philosophy of science, little but remnants remain of the bold rationale that once promised truth through method. One now senses a profound alteration taking place in both the concept of knowledge and of science, an alteration that may prove to be as significant as the Copernican revolution, the emergence of Darwinism, or the development of Freudian theory. As a result of the latter transformations, humans are no longer seen as the center of the universe, as essentially different from animals, or as fully conscious of the wellsprings of their activity. In the present case, however, we confront the loss of the human capacity for objective knowledge. **Toward**

**Transformation in Social Knowledge** Kenneth J. Gergen, 1994-03-07 Critical resistance to traditional empirical methods and the quest for foundational knowledge of human action is widespread. Recognition of theoretical and methodological inadequacies has sparked a search for a more robust conception of human science. This fascinating and carefully reasoned book develops the argument for human science as social construction. Demonstrating that descriptions of human action can neither be derived from nor corrected by scientific observation, Gergen provides a bold interdisciplinary challenge to traditional views, thus clearing the way for significant alterations in scientific practice. In the preface to the Second Edition, Gergen describes the major movements taking place since the First Edit. **Social Constructionism** Andy Lock, Tom
