Transforming the Global Biosphere Elliott Maynard,2000-09 Transforming the Global Biosphere is based on the author s presentations to the World Future Society and was written at the suggestion of Nobel Peace Prize Nominee and former UN Assistant Secretary General Dr Robert Muller The author feels strongly that in order to reverse the presently destructive impacts of Human Technology on the Global Biosphere a Transformative Revolution in Human Consciousness must first take place Such a Magnificent Revolution would take the form of Twelve Futuristic MetaStrategies each of which would represent a Key SocioEcological Paradigm in itself Each chapter of the book is developed around a MetaStrategy providing examples of the Major Problems as well as Innovative Solutions for reversing these Destructive Trends through selected applications of Unique Alternative Technologies and Strategies Dr Maynard s Twelve MetaStrategies for Planetary Management are essentially a set of enlightened yet effective tools for Creative Thinking and Action They are designed to promote environmentally sustainable future scenarios for the maximum benefit for Humans their Planetary Homeworld and for the Generations Yet to Come In spite of the mounting evidence of environmental damage and disturbance to our Natural Planetary Systems Dr Maynard contends that solutions to these problems are available through insightful applications of Alternative Technologies which can provide Clean Renewable Energy Efficient Non Polluting Transportation Hi Energy Nutrition and Ecologically Appropriate Lifestyles for everyone on Earth To achieve such a meaningful and lasting transformation the author feels we must move
