OECD Trade Policy Studies Trade that Benefits the Environment and Development Opening Markets for Environmental Goods and Services OECD, 2005-11-28 This volume is a compendium of working papers intended to be a practical tool for negotiations on liberalising trade in environmental goods and services

Sustainable Development and Free Trade Shawkat Alam, 2007-10-31 Examining institutions rather than themes this book provides a comprehensive survey of the inter relationship between trade induced economic growth and the environment and its impact on the global quest for sustainable development Covering contemporary developments on both a global and regional level in a systematic fashion and examining the United Nations approach to sustainable development it is of interest to a range of disciplines

International Trade and Climate Change World Bank, 2007-10-15 Climate change remains a global challenge requiring international collaborative action Another area where countries have successfully committed to a long term multilateral resolution is the liberalization of international trade Integration into the world economy has proven a powerful means for countries to promote economic growth development and poverty reduction The broad objectives of the betterment of current and future human welfare are shared by both global trade and climate regimes Yet both climate and trade agendas have evolved largely independently through the years despite their mutually supporting objectives Since global emission goals and global trade objectives are shared policy objectives of most countries and nearly all of the World Bank's clients it makes sense to consider the two sets of objectives together This book is one of the first comprehensive attempts to look at the synergies between climate change and trade objectives from economic legal and institutional perspectives It addresses an important policy question how changes in trade policies and international cooperation on trade policies can help address global environmental spillovers especially GHG emissions and what the potential effects of national environmental policies that are aimed at global environmental problems might be for trade and investment It explores opportunities for aligning development and energy policies in such a way that they could stimulate production trade and investment in cleaner technology options

Heterodox views on economics and the economy of the global society G. Meijer, W.J.M. Heijman, J.A.C. van Ophem, B.H.J. Versteegen, 2023-08-28 This book contains ideas to develop interdisciplinary and transdisciplinary views on economy and society It aims to disseminate heterodox ideas on various subjects related to economics and global society The book is organised in six parts Part 1 contains the key lectures of Backhaus on the concept of state sciences and of Klamer on the importance of culture for economics Parts 2-6 contain successively contributions in the areas of economic paradigms and theories population and society corporate issues environment and international relations Examples of the content are the changes of family life cycles due to the rise of non traditional households subjective and objective inflation rates after the introduction of the Euro the economics of genetic engineering the contribution of foreign direct investment to the economic development of host countries the inaccuracy of economic models applied in places

characterized by extreme income disparities the improvement of political and corporate governance evolutionary thinking and emission trading freedom and order in the European Union the reform of social policy in Europe The book provides interesting creative multi disciplinary ideas with respect to various topical issues concerning the contemporary global society It is highly recommended for economists and social scientists in search of broad views on social science and society

Trade Liberalisation and Environment Linkages Michelle Pressend,2006 One of the most controversial aspects of the negotiations at the World Summit on Sustainable Development in 2002 was an attempt by some delegations to require that multilateral environmental agreements be made fully compatible with trade rules before they could be ratified *Trade and Environment Review 2006* United Nations Conference on Trade and Development,2006 This report examines the relationship between environmental and health related requirements and market access for developing countries It considers the key issues involved and identifies policy options at the national and multilateral levels to assist developing countries to strengthen capacity in order to effectively respond to the trade and development opportunities and challenges presented by these requirements in export markets It covers both general and sectoral analyses focusing on two sectors where environmental requirements are critical to market access relating to electrical and electronic equipment and organic agricultural products
