Behind the Development Banks Sarah Babb, 2009-08-01 The World Bank and other multilateral development banks (MDBs) carry out their mission to alleviate poverty and promote economic growth based on the advice of professional economists. But as Sarah Babb argues in *Behind the Development Banks*, these organizations have also been indelibly shaped by Washington politics, particularly by the legislative branch and its power of the purse. Tracing American influence on MDBs over three decades, this volume assesses increased congressional activism and the perpetual selling of banks to Congress by the executive branch. Babb contends that congressional reluctance to fund the MDBs has enhanced the influence of the United States on them by making credible America's threat to abandon the banks if its policy preferences are not followed. At a time when the United States role in world affairs is being closely scrutinized, *Behind the Development Banks* will be necessary reading for anyone interested in how American politics helps determine the fate of developing countries.

Sustainable Development Goals and UN Goal-Setting Stephen Browne, 2017-04-21 This book explores the record of the UN development system (UNDS) over more than 70 years as a fount of ideas and concepts in development as a contributor to development thinking and strategy and as the principal source of global development goals from the first UN Development Decade to the SDGs. It also examines the more mixed record of the UNDS in its operational role and asks how the ideational and operational functions can be more successfully aligned and what changes such an alignment would imply. The chapters consider the logic of global governance through international organizations, the origins, functions, and structure of the UN development system, UN contributions to development thinking, the UN's development agendas (1960s to 2015), reforming the UN development system, the future of the UN and multilateralism. The book will be of great use for students and scholars studying political science, international organizations, the UN, and development, as well as for practitioners associated with the UN, including member state missions, UN staff, and development cooperation professionals.

Foreign Aid in China Hong Zhou, Jun Zhang, Min Zhang, 2014-10-16 Foreign aid has connected China and the international community through many channels and created new types of strong partnerships throughout the world. As a recipient country, China and donors have engaged in an unprecedentedly deep level of cooperation on development-related issues. China's development experience has resulted in key changes to the relationships and partnerships between China and donors from receiving foreign aid to entering into development cooperation. China has provided valuable experiences for other developing countries, experiences that are all the more relevant because they have revealed key factors at work in developing recipient countries. This has also led China to form closer cooperative relationships with other developing countries with regard to development issues. In short, foreign aid has changed China.
