Un Mundo Comunicado:

Sociedad digital, comunicación y conocimiento: retos para la ciudadanía en un mundo global Lorena R. Romero Domínguez, Nuria Sánchez-Gey Valenzuela, 2022-11-25 **Comunicaciones de la organización** Darío Rodríguez, María Pilar Opazo, 2025-10-22 Las organizaciones están hechas de comunicaciones y es mediante estas que cumplen su importante función social ofrecer soluciones a los problemas de la sociedad Pero cómo se comunican realmente las organizaciones Qué ocurre cuando el mensaje no llega no se entiende o no es aceptado Este libro convertido en un clásico de la disciplina explora esas tres improbabilidades fundamentales que enfrenta toda organización A través de una escritura clara y un enfoque riguroso los autores analizan las múltiples formas en que se comunican los sistemas sociales desde la negociación hasta el marketing desde las redes sociales hasta las crisis Con una mirada original inspirada en la teoría de sistemas sociales de Niklas Luhmann esta nueva edición actualizada y ampliada ofrece herramientas conceptuales y ejemplos prácticos para comprender por qué en el mundo actual cada vez más incierto y digitalizado comunicar no solo es improbable sino esencial

Comunicación, campo y objeto de estudio Maria Immacolata Vassallo de Lopes, Raúl Fuentes N., 2001 Qué campo de estudios garantiza la comprensión de una era En la llamada era de la comunicación las ciencias sociales y disciplinas como las matemáticas la informática y la economía participan en el estudio de este fenómeno social Pero cuál es el campo específico de lo que se llama ciencias de la comunicación cuál es el estado de la cuestión en esta disciplina cuyos fundamentos teóricos se construyeron en otra realidad social La mundialización de la economía y el desarrollo de las tecnologías telemáticas han generado en lo práctico y en lo conceptual una nueva realidad Una sociedad de los medios que obliga a la revisión de teorías y conceptos que se habían considerado inamovibles El esquema tradicional de emisor mensaje receptor da paso a las nuevas posibilidades del hipertexto y la tecnología multimedia La comunicación es ahora parte de la economía ya no solo de la ideología La globalización ha afectado de manera irreversible los procesos de construcción de la identidad Los mitos de nuestro tiempo Umberto Galimberti, 2013-02-14 Un libro de cabecera en el que se reconstruyen los mitos de la sociedad contemporánea Los mitos son ideas que no se poseen ni se rigen a través de la lógica sino de la psicología son ideas que hemos mitificado porque no plantean problemas facilitan el juicio y nos dan seguridad Juventud e inteligencia felicidad y amor moda y técnica seguridad y poder y también mercado crecimiento económico nuevas tecnologías Estos son los mitos de nuestro tiempo las ideas que más nos influyen y nos definen como individuos y como sociedad lo que la publicidad y los medios de comunicación de masas nos proponen como valores y nos imponen como prácticas sociales Umberto Galimberti nos explica que para recuperar nuestra presencia en el mundo debemos visitar nuestros mitos ya sean los individuales o los colectivos y someterlos a una revisión crítica para liberarnos de falsas ideas y encontrar un buen lugar en el mundo *Anuario iberoamericano de derecho minero. VIII* Milton Fernando Montoya Pardo, Ana Paola Gutiérrez Rico, Paola Bermúdez Roldán, 2024-06-13 Esta obra realiza un análisis teórico práctico sobre el sector minero en varios países de Iberoamérica y los

avances en transición energética Los investigadores revisan cómo ha evolucionado el sector minero en diferentes procesos de transición y el desarrollo de la minería hasta llegar a considerar el sector y los minerales estratégicos como factores que apalancan un proceso seguro desde el punto de vista social ambiental y económico La imagen anclada en el pasado de esta actividad contrasta con la minería actual La extractiva es una actividad estratégica en la lucha contra el cambio climático como se reconoce en la Unión Europea ley europea sobre el clima Reglamento UE 2021/1119 del Parlamento Europeo y del Consejo de 30 de junio de 2021 y el tránsito hacia un modelo económico descarbonizado y digital cuyo fin debe ser el desarrollo sostenible en el marco de los Objetivos de Desarrollo Sostenible ODS de la Agenda 2030 de Naciones Unidas También en el caso de América Latina se subraya el papel de la minería en la economía verde Desde 2017 el Banco Mundial publicó su informe El papel creciente de los minerales y metales para un futuro con bajas emisiones de carbono en el cual afirma que la transición a la energía limpia será significativamente intensiva en minerales Asimismo en su informe de 11 de mayo de 2020 Minerales para la acción climática la intensidad de los minerales de la transición a la energía limpia concluye que la producción de minerales como el grafito el litio y el cobalto podrá aumentar en casi un quinientos por ciento para 2050 para cumplir la creciente demanda de tecnologías de energía limpia También podemos citar el caso de la Unión Europea caracterizada por una gran dependencia de materias primas minerales intensificada por la pandemia de la COVID-19 y la guerra en Ucrania cuya vulnerabilidad puso de manifiesto la Comisión Europea en el estudio Critical Raw Materials for Strategic Technologies and Sectors in the EU A Foresight Study 2020 *Los avisos*, 1876 **Un mundo vulnerable** Jorge Riechmann, 2000 *Informe* Colombia.
