medium skill group A skill bias in labor demand trends is found and higher wage flexibility could have alleviated the dispersion in unemployment rates across skill groups The main driving force appears to be technological progress however the evidence is also consistent with international trade causing a deterioration in the labor market position of low skilled workers With regard to wage bargaining evidence for a short run but not for a long run moderation of wage demands is found in the presence of a negative labor demand shock Detroit ,1914 **The Detroit** ,1914 **Liberty** ,1925 Bulletin of the Library Company of Philadelphia Library Company of Philadelphia,1918 **Parliamentary Debates** New Zealand.
