University For The Twenty First Century:

The University in the Twenty-first Century Yehuda Elkana, Hannes Klöpper, 2016-08-20 This volume addresses the broad spectrum of challenges confronting the university of the 21st century Elkana and Klöpper place special emphasis on the questions regarding the very idea and purposes of universities especially as viewed through curriculum what is taught and pedagogy how it is taught The ideas recommended here for reform concern especially undergraduate or Bachelor degree programs in all areas of study from the humanities and social sciences to the natural sciences the technical fields law medicine and other professions The core thesis of this book rests on the emergence of a New Enlightenment which requires a revolution in curriculum and teaching in order to translate the academic philosophy of global contextualism into universal practice or application The university is asked to revamp teaching in order to foster critical thinking that would serve students their entire lives This book calls for universities to become truly integrated rather than remaining collections of autonomous agencies more committed to competition among themselves than cooperation in the larger interest of learning

May, Thomas Maissen, 2021-06-17

National history has once again become a battlefield In internal political conflicts which are fought on the terrain of popular culture museums schoolbooks and memorial politics it has taken on a newly important and contested role Irrespective of national specifics the narratives of new nationalism are quite similar everywhere National history is said to stretch back many centuries expressing the historical continuity of a homogeneous people and its timeless character This people struggles for independence guided by towering leaders and inspired by the sacrifice of martyrs Unlike earlier forms of nationalism the main enemies are no longer neighbouring states but international and supranational institutions To use national history as an integrative tool new nationalists claim that the media and school history curricula should not contest or question the nation and its great historical deeds as doubts threaten to weaken and dishonour the nation This book offers a broad international overview of the rhetoric contents and contexts of the rise of these renewed national historical narratives and of how professional historians have reacted to these phenomena The contributions focus on a wide range of

representative nations from around all over the globe **A Distinct Twenty-First Century Pentecostal Hermeneutic** Harlyn Graydon Purdy,2015-06-22 Why another book about biblical interpretation hermeneutics First this is not just another book about hermeneutics It deals specifically with hermeneutics as practiced by Pentecostals rather more accurately as hermeneutics should be practiced by Pentecostals The book presents a distinct Pentecostal hermeneutic that moves away from exclusive use of historical grammatical methodology The hermeneutic presented here employs an eclectic methodology and a quadratic strategy Scripture Spirit trained leader and community in the proposed hermeneutic are shown to work together to produce an interpretation that engages both creative imagination and authorial intent The text offers pastors professors and laity alike a method and approach that will allow them to interpret Scripture from a clearly Pentecostal perspective An important addition to the book is an outline for an undergraduate course instructing students in this distinct Pentecostal hermeneutic *Museum Philosophy for the Twenty-First Century* Hugh H. Genoways,2006-06-08 What

underlying philosophy and mission should museums pursue in the first half of the twenty first century In *Museum Philosophy* twenty four authors use the lenses of a variety of disciplines to answer this essential question Museum professionals offer their answers alongside philosophers historians political scientists educators sociologists and others in a wide ranging exploration of institutions from art museums to zoos Hugh Genoway s book offers philosophical and ethical guidelines describes the ways specific institutions illustrate different philosophies examines major divisions in the museum community and explores outreach and engagement between the museum and its larger community Both established museum professionals and students of museum studies will benefit from this insightful look into the foundations and future of their field

Twenty-First Century Anxieties Merle Tönnies,Eckart Voigts,2022-10-24 The volume uses an interdisciplinary approach to examine how 21st century British theatre increasingly intercuts dystopian and utopian elements to create innovative strategies for addressing current social and political concerns In the case studies a key role is given to the ways in

American Higher Education in the Twenty-first Century Philip G. Altbach, Robert O. Berdahl, Robert Oliver Berdahl, Patricia J. Gumport, 1999 America's colleges and universities are social institutions embedded in the wider society and subject in various ways to its constraining forces In American Higher Education in the Twenty first Century researchers who share this understanding explore the new realities of higher education and consider its greatest challenges for the next century Subject to increasing scrutiny by the media and the public colleges and universities must wrestle with a wide range of issues generated by their various external constituencies Academic leaders rearrange their curricula to meet demands for multiculturalism They seek an appropriate response as race based admissions procedures come under attack They assess student learning and monitor faculty productivity while simultaneously responding to calls for the end of tenure and for explanations of why the cost of attending college has risen so dramatically Using the changing social political and economic contexts of colleges and universities as a lens for examining these complex issues the contributors seek to understand the forces whether unique to our era or rooted in the past that currently influence higher education and will continue to do so in the next century Whether discussing finance or technology or academic freedom or the canon the authors find that relations between academic institutions and their surrounding societies have generally been ambivalent both involved and withdrawn servicing and criticizing needing and being needed Understanding the complex interplay between institutions and external forces they conclude is the key to guiding the endeavors of faculty students and administrative leaders alike
