**The New Conservatism** Jürgen Habermas, 2015-10-07 Jürgen Habermas is well known for his scholarly writings on the theoretical foundations of the human sciences. The New Conservatism brings to light another side of Habermas's work, showing him to be an incisive commentator on a wide range of contemporary themes. The 1980s have been a crucial decade in the political life of Western democracies in general and of the Federal Republic of Germany in particular. The transformations that accompanied a shift from 13 years of Social democratic rule in Germany to government by the conservative Christian Democrats are captured in this series of insightful, often passionate political and cultural commentaries. The central theme uniting the essays is the German problem of coming to terms with the past, a problem that has important implications outside Germany as well. Of particular note are the essays on what has come to be known as the Historians' Debate. Habermas's attack on the revisionist German historians who have been trying to trivialize and normalize the history of the Nazi period and his defence of the need for a realistic and discriminating approach to the Nazi period and its legacy. Habermas also takes up the recent debate concerning Martin Heidegger's involvement with Nazism and the rise of the neoconservative movement in Europe and America. In particular, the essay on *The New Obscurity* combines Habermas's analysis of the problems of the welfare state with his suggestions for avenues open to utopian impulses today. **University**

**Reform Today** Andrei Marga, 2001 *Daily Report, Foreign Radio Broadcasts* United States. Central Intelligence Agency, 1968 **Higher Education: Handbook of Theory and Research** John C. Smart, 2009-04-24 Published annually since 1985, the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities. Each chapter provides a comprehensive review of research findings on a selected topic, critiques the research literature in terms of its conceptual and methodological rigor, and sets forth an agenda for future research intended to advance knowledge on the chosen topic. The Handbook focuses on twelve general areas that encompass the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community. The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world. **Towards a New Research Era**, 2023-04-17 The book is focused on distorted research and university

education in recent decades and on alternatives for a new research era. It deals with the critique, explanation, and normativity of bureaucratically, commercially, and ideologically shaped humanities and social sciences. The authors analyse it in a groundbreaking way, putting the West in a global comparison with the non-Western world. Particularly, they pay special attention to Central Europe and the major countries and macro regions: Latin America, China, Russia, Africa, and India. This is an illuminating book for readers interested in philosophy, sociology, global studies, education studies, and related disciplines.

**Going to School in East Asia** Gerard Postiglione, Jason Tan, 2007-09-30 Education in East Asia varies widely due to the cultural and political histories of each country. The communist governments of China, North Korea, and Vietnam mandate

schooling differently from the limited democracy of Hong Kong and the parliamentary government of Japan The history of the educational philosophies systems and curricula of seventeen East Asian countries are described here with a timeline highlighting educational developments and a special day in the life feature a personal account of what it is like for a student to attend school in that country

**Today's Latin America** Robert Jackson Alexander,1968 **Congressional Record** United States. Congress,1970 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873 State and Market in Higher Education Reforms Hans G. Schuetze,Germán Álvarez Mendiola,Diane Conrad,2012-09-05 Universities have never been static Even so it is fair to say they have experienced a most radical transformation in the past twenty years During this period the role and responsibility of the state generally have been broadly limited while allowing market forces private ownership and control more influence But even where the state is still the main provider or funder it relies increasingly on market mechanisms for example contractual relations between state and institutions competition among providers for resources and external assessment of outputs which means the results or impact of what universities do in particular teaching and research The new terminology speaks of price and competition inputs and outputs resources cost and benefits demand and supply provider and customer consumers and investors quality control and accountability Education and post secondary education especially are increasingly seen as matters for markets Formal post secondary education becomes a service commercialized and traded across national borders This volume on changing relationship between state and market contains besides an introductory analytic overview of the issues accounts from different countries regions and thematic perspectives Chapter authors describe and analyze government reforms and other developments that have directly or indirectly affected this relationship Although the geographical focus is on North America especially Mexico South East Asia and Europe the phenomenon is not limited to these regions and countries but worldwide
