Neither Victim nor Survivor Marilyn Nissim-Sabat, 2009-07-16 In *Neither Victim nor Survivor* Thinking toward a New Humanity Marilyn Nissim Sabat offers a comprehensive critique of the interrelated concepts of victim and survivor as they have been ideologically distorted in Western thought Framed by the phenomenological perspective of Edmund Husserl Nissim Sabat carries out her argument through an intense engagement with current scholarly work on Toni Morrison s *Beloved* Sophocles *Antigone* akrasia psychoanalysis critical race theory feminist philosophy of science and Marxism Nissim Sabat ultimately proposes that a new consciousness enabled by the phenomenological attitude of the way in which ideological distortion of the concepts of victim and survivor helps to perpetuate victimization will empower us to find ways to end victimization and its anti human consequences The book s interdisciplinary approach will make it appealing to a broad range of students and scholars alike

Diversity Issues in Substance Abuse Treatment and Research Sana Loue, 2007-06-02 lthough the term diversity is widely used there is often no agree A ment as to its meaning or how attention to diversity should be erationalized within the context of programming or research This text provides a foundation for the examination of such issues with sugg tions for the integration of various approaches into substance use tre ment programs and research The impetus for this work derived from multiple interactions over a period of several years with colleagues s dents research participants and community based providers who noted the frequent inattention paid to such concerns in the context of treatment and research often despite an acknowledgment of a group s particular historical legacy in the United States and the impact of that history on the initiationandprolongationofsubstanceusewithinaspeci edcommunity or the barriers to treatment that may have resulted

Chapter 1 defines what is meant by diversity through an examination of related terms such as culture, ethnicity, race, sex, gender, and sexual orientation. Clearly, this discussion does not and cannot reflect all possible permutations of human existence that reflect diversity. For instance, although the text does make mention of considerations related to religious differences and cognitive capacity, neither is highlighted as a separate topic. Additionally, the emphasis on specific groups is not meant to imply that other groups such as Euro-Americans or heterosexual men do not have concerns that may differ from those of other communities and that deserve consideration in the development and implementation of programs and research endeavors. However, trite it may seem, one text cannot do it all.

Research Anthology on Advancements in Women's Health and Reproductive Rights Management Association, Information Resources, 2022-05-06 Reproductive health and rights are critical topics in today's society as laws and policies are continuously debated and adjusted across the world. There are many different outlooks on these issues, and different countries have widely varying laws in place at present. In order to better understand where the world currently is regarding these pressing discussions, further study is needed on the status of women's reproductive rights. The *Research Anthology on Advancements in Women's Health and Reproductive Rights* provides a thorough review of the current research available regarding reproductive health. The book discusses how various countries and regions are handling reproductive rights, as well as current issues women face within their reproductive health journeys. Covering topics such as sexual health, gender, and pregnancy, this major reference work is ideal for nurses, government officials, policymakers, healthcare professionals, researchers, scholars, academicians, practitioners, instructors, and students.

Filming the Middle Ages Bettina Bildhauer, 2013-06-01 In this groundbreaking account of film history, Bettina Bildhauer shows how, from the earliest silent films to recent blockbusters, medieval topics and plots have played an important but overlooked role in the development of cinema. *Filming the Middle Ages* is the first book to define medieval films as a group and trace their history from silent film in Weimar Germany to Hollywood and then to recent European co-productions. Bildhauer provides incisive new interpretations of classics like Murnau's *Faust* and Eisenstein's *Alexander Nevsky*, and she rediscovers some forgotten works like Douglas Sirk's *Sign of the Pagan* and Asta Nielsen's *Hamlet*. As Bildhauer explains, both art house films like *The Seventh Seal* and *The Passion of Joan of Arc*, and popular films like *Beowulf* or *The Da Vinci Code* cleverly use the Middle Ages to challenge modern ideas of historical progress, to find alternatives to a print-dominated culture, and even to question what makes us human. *Filming the Middle Ages* pays special attention to medieval animated and detective films and provocatively demonstrates that the invention of cinema itself is considered a return to the Middle Ages by many film theorists and film makers. *Filming the Middle Ages* is ideal reading for medievalists with a stake in the contemporary and film scholars with an interest in the distant past.

Gender, Ethnicity, and Health Research Sana Loue, 2007-05-08 Health researchers routinely evaluate health and illness across subgroups defined by their sex, gender, ethnicity, and race. All too often, these classifications are proffered as an explanation for any differences that may be detected.

for example in access to care frequency of disease or response to treatment Relatively few researchers however have examined what these classifications mean on a theoretical level or in the context of their own research Assume for example that a researcher concludes from his or her data that African Americans utilize certain surgical procedures less frequently than whites This conclusion may mean little without an examination of the various underlying issues Is there such a construct as race at all How were whites and African Americans classified as such Does this finding reflect inappropriate overutilization of the specific procedures among whites or inappropriate underutilization among African Americans To what extent are socioeconomic status and method of payment related to the less frequent use Are there differences in the manner in which health care providers present the various treatment options to whites and to African Americans that could account for these differences in utilization Are there differences in health care seeking and health care preferences between the two groups that would explain the difference in utilization Is the racial classification a surrogate measure for another variable that has remained unidentified and unmeasured All too often unfortunately such issues are ignored or lightly dismissed with an entreaty for additional research
