**An Unquiet Pedagogy** Eleanor Kutz, Hephzibah Roskelly, 1991 An Unquiet Pedagogy argues for a new approach to teaching English in the high school and college classroom one that reconceives the relationship of literacy and the learner The title is taken from an essay by Paulo Freire in his book with Donaldo Macedo entitled Literacy Reading the Word and the World Like Freire the authors believe that pedagogy must be critical that it must examine the assumptions that teachers and students bring to any educational enterprise that it must take into account the contexts of learners lives and that it must question rather than quietly accept existing practices Voices of beginning and experienced teachers are heard often in the book exploring how such an unquiet pedagogy might come to be The authors examine the experiences of these teachers as well as their own showing how the classroom can become a place of inquiry for both teachers and students and how theory and research that provide an integrated perspective on language literacy and culture must inform teaching practice Their aim is to transform the English classroom into a place where the imagination becomes central and where learners construct knowledge in the development of real literacy

**Language and Gender in the Military** Edith A. Disler, 2008 In the thirty year history of the study of language and gender theory and application have branched incrementally like the reaches of a family tree The study of language and gender has progressed from an eye opening review of differences between the language of women and men to observations that language served to preserve domination of one sex over another and on to a cross cultural approach which observes that the ritual styles of talk that are observed among even the youngest girls and boys at play remain with them as women and men Language and gender has been studied in many institutional and organizational environments including medical legal law enforcement academic and business settings While all of those settings have historically been marked by gender based differentials in opportunity pay and power one of the most metaphorically and demographically gender differentiated institutions has remained unexamined in the sociolinguistic literature the military The military is particularly interesting for linguistic study because it is veritably synonymous with the socio cultural construction of American masculinity and therefore a fascinating venue for the study of language gender and power With this innovative study the author opens the door to considerations of power gender dynamics and language and ideology in a community that has not yet been studied using the techniques of discourse analysis And while some have criticized the utility of examining outlying cases particularly in studies of gender or sexuality in language the military community though not studied can hardly be considered an outlying case On the contrary American military identity is part of American identity in that it

influences the American masculine construct and has affected 26 million veterans and their families as well as those who may not be in the military but work with and near military members and installations on a regular basis Also unique to this study and the author's analysis of the usage of ma'am and sir is an approach which does not necessarily examine how women and men use language but how those in their community use language to address them as women and men This landmark book provides a refreshing perspective on gender and language dynamics in a setting not yet examined Language and Gender in the Military will be a vital resource for those in gender and language studies
