But while that might be true, it is not the real secret behind its success. The underestimated and often overlooked truth lies in the way of how Apple protects its innovations. The objective of this work is to examine why having a defense system in place for immediate and appropriate response is crucial for successful companies to sustain their profitability and position in the market at the same time. We will further analyze why leading incumbents fail to respond to offensive threats and lose their right to exist. Moreover, we will discuss the defensive strategies and tactics a company might utilize when under attack. To visualize the need for and the effectiveness of successful defensive strategies, we will analyze the way how the Cupertino-based company has succeeded in retaining its leading position to become the business world's most valuable brand of today. *Ultimate Beginner Tech Start* David Mash, 2000 This book and CD-ROM package is designed to introduce musicians to all of the incredible resources available to them on computer software and the Internet.
