*Ancient Roman Solutions to Modern Legal Issues* Anna Mancini, 2004 Our Law and its philosophy have been conceived for an economic world where the main source of wealth was material Although this world no longer exists its laws are still alive and slow down the development of modern economies Patent law strikingly shows this fact Invented mainly during the industrial revolution in order to protect tangible inventions it could not be applied to the new intangible inventions of the 20th century Software for example has been denied protection under patent law due to its lack of materiality Since such a cause of denial is economically absurd we should adapt patent law to the virtual world This was not done and so no new intangible invention can benefit from this protection through a lack of tangibility Long before us the ancient Romans had understood that the intangible world and the material world do not function the same way Since they were very practical people they took this reality into account to build their legal system Their legal experience has become valuable for a modern world that is rediscovering the value of ideas and people s wealth too long eclipsed by materialism

Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes.
