Gregory,1995-12-18 For more than forty years NATO premised its defence on credible nuclear deterrence Underwriting this deterrence was NATO s strategy and the nuclear weapons and command and control systems intended to make the strategy an operational reality This book examines NATO s attempts between 1952 and 1990 to achieve the political and military control of nuclear weapons operations in a multinational organisation By using case studies of US British French and NATO nuclear weapons operations and empirical evidence from Cold War crises it provides an analysis of NATO s experience and offers insights for the present day *The Command and Control of Strategic Nuclear Forces* Darren John Mellor-Clark,1996

Command and Control Eric Schlosser,2014-08-26 The Oscar shortlisted documentary *Command and Control* directed by Robert Kenner finds its origins in Eric Schlosser s book and continues to explore the little known history of the management and safety concerns of America s nuclear arsenal A devastatingly lucid and detailed new history of nuclear weapons in the U S Fascinating Lev Grossman TIME Magazine Perilous and gripping Schlosser skillfully weaves together an engrossing account of both the science and the politics of nuclear weapons safety San Francisco Chronicle A myth shattering expos of America s nuclear weapons Famed investigative journalist Eric Schlosser digs deep to uncover secrets about the management of America s nuclear arsenal A groundbreaking account of accidents near misses extraordinary heroism and technological breakthroughs *Command and Control* explores the dilemma that has existed since the dawn of the nuclear age How do you deploy weapons of mass destruction without being destroyed by them That question has never been resolved and Schlosser reveals how the combination of human fallibility and technological complexity still poses a grave risk to mankind While the harms of global warming increasingly dominate the news the equally dangerous yet more immediate threat of nuclear weapons has been largely forgotten Written with the vibrancy of a first rate thriller *Command and Control* interweaves the minute by minute story of an accident at a nuclear missile silo in rural Arkansas with a historical narrative that spans more than fifty years It depicts the urgent effort by American scientists policy makers and military officers to ensure that nuclear weapons can t be stolen sabotaged used without permission or detonated inadvertently Schlosser also

looks at the Cold War from a new perspective offering history from the ground up telling the stories of bomber pilots missile commanders maintenance crews and other ordinary servicemen who risked their lives to avert a nuclear holocaust At the heart of the book lies the struggle amid the rolling hills and small farms of Damascus Arkansas to prevent the explosion of a ballistic missile carrying the most powerful nuclear warhead ever built by the United States Drawing on recently declassified documents and interviews with people who designed and routinely handled nuclear weapons Command and Control takes readers into a terrifying but fascinating world that until now has been largely hidden from view Through the details of a single accident Schlosser illustrates how an unlikely event can become unavoidable how small risks can have terrible consequences and how the most brilliant minds in the nation can only provide us with an illusion of control Audacious gripping and unforgettable Command and Control is a tour de force of investigative journalism an eye opening look at the dangers of America s nuclear age

China's Nuclear Forces Larry M. Wortzel,2007

Bernard Brodie and the Foundations of American Nuclear Strategy Barry Howard Steiner,1991 Steiner analyzes how and why Brodie s understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets He shows the tremendous effect Brodie s work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom

History of the United States Strategic Command (USSTRATCOM) - Covering Nuclear Weapons, Cold War Strategy, Service Rivalries, and Arms Control Department of Defense,U. S. Military,U. S. Government,2018-03-07 This history began as a project to commemorate the tenth anniversary of the US Strategic Command As June 2002 approached it became apparent that the command would be altered fundamentally by proposed modifications to the Unified Command Plan We learned that a new command would be established that combined the missions of the United States Strategic Command and the United States Space Command Names were proposed for the new command but none of them seemed to fit Then on July 11 2002 Secretary of Defense Donald Rumsfeld gave the new command the same name as its predecessor This unclassified history is of the US Strategic Command that was established on June 1 1992 and disestablished on October 1 2002 The original United States Strategic Command was established on the first of June 1992 It owed its existence to the end of the Cold War and a new view of the place of nuclear warfare in overall US defense policy While the circumstances were changed the idea of a unified command with responsibility for the employment of nuclear weapons was not new When General George L Butler was establishing US Strategic Command he found it useful for cultural reasons to anchor the need for a STRATCOM in the past and particularly to identify it with General Curtis E LeMay the widely acknowledged founding father of the Strategic Air Command LeMay was

an unapologetic advocate of a national defense strong enough to overwhelm any potential enemy especially the Soviet Union which he deeply distrusted He was committed to a belief in air power s exclusive preeminence in achieving victory and as a subtext to that the possession of significant numbers of nuclear weapons and the airframes capable of delivering them to their intended targets LeMay who was not alone in this opinion was successful in his argument and the emphasis in the post Korean Conflict military build up was in the production of nuclear weapons the bombers to carry those weapons and support structure for both Another significant thread in the development of the early idea of a strategic command to control nuclear forces and targeting was interservice rivalry particularly between the Air Force and the Navy Until 1947 there were two services the Army and the Navy Air forces were part of the Army and the US Marine Corps was under the Secretary of the Navy The Secretary of War and the Secretary of the Navy were cabinet positions that had direct access to the President Serious rivalries had existed between the two services as they competed for resources and during World War II friction had developed between the Army and Navy over coordination Following the Second World War the President and Congress sought to mitigate this rivalry through passage of the National Security Act of 1947 That act established the Joint Chiefs of Staff the Chairman of the Joint Chiefs of Staff the Secretary of Defense and the independent Air Force with its own Chief of Staff The rivalry between the newly separate Air Force and the Navy was even more intense than that between the Army and the Navy
