Latter,2009-07 This scarce antiquarian book is a facsimile reprint of the original Due to its age it may contain imperfections such as marks notations marginalia and flawed pages Because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world s literature in affordable high quality modern editions that are true to the original work **Hearings on the Nuclear Initiative: California's nuclear future, part 1** California. Legislature. Assembly. Committee on Resources, Land Use, and Energy,1975 Hearings on proposition 15 **World Nuclear Association** ,2008 Filling the Hole in the Nuclear Future Robert Jacobs,2010-04-12 From the dawn of the atomic age art and popular culture have played an essential role interpreting nuclear issues to the public and investigating the implications of nuclear weapons to the future of human civilization Political and social forces often seemed paralyzed in thinking beyond the advent of nuclear weapons and articulating a creative response to the dilemma posed by this apocalyptic technology Art and popular culture are uniquely suited to grapple with the implications of the bomb and the disruptions in the continuity of traditional narratives about the human future endemic to the atomic age Filling the Hole in the Nuclear Future explores the diversity of visions evoked in American and Japanese society by the mushroom cloud hanging over the future of humanity during the last half of the twentieth century It presents historical scholarship on art and popular culture alongside the work of artists responding to the bomb as well as artists discussing their own work From the effect of nuclear testing on sci fi movies during the mid fifties in both the U S and Japan to the socially engaged visual discussion about power embodied in Japanese manga Filling the Hole in the Nuclear Future takes readers into unexpected territory Hearings on the Nuclear Initiative: California's nuclear future, part 2 California. Legislature. Assembly. Committee on Resources, Land Use, and Energy,1975 Hearings on proposition 15 **Iran's Nuclear Future** Lynn E. Davis,2011 As Irans nuclear program evolves U S decisionmakers will confront a series of critical policy choices involving complex considerations and trade offs The U S Air Force will need to prepare to carry out whatever policies are chosen Hearings on the Nuclear Initiative: California's nuclear future California. Legislature. Assembly. Committee on Resources, Land Use, and Energy,1975 Hearings on proposition 15 **Air University Review** ,1982 Underestimated Second Edition Henry D. Sokolski,2016-08-19 With the world focused on the nuclear crisis in Iran it is tempting to think that addressing this case North Korea and the problem of nuclear terrorism is all that matters and is what matters most Perhaps but if states become more willing to use their nuclear weapons to achieve military advantage the problem of proliferation will

become much more unwieldy In this case U S security will be hostage not just to North Korea Iran or terrorists but to nuclear proliferation more generally diplomatic miscalculations and wars between a much larger number of possible players This in a nutshell is the premise of Underestimated Our Not So Peaceful Nuclear Future which explores what we may be up against and how we think about this future Will nuclear weapons spread in the next 20 years to more nations than just North Korea and possibly Iran Might they be used and if so what might we suffer Finally what can be done Underestimated examines each of these questions NPEC created the first version of Underestimated in November of 2014 An updated version was published by SSI at the end of 2015 This second edition includes the very latest citations and research [News Releases](#) ,1984

Sovacool,2019-03-04 This book examines the visions fantasies frames discourses imaginaries and expectations associated with six state of the art energy systems nuclear power hydrogen fuel cells shale gas clean coal smart meters and electric vehicles playing a key role in current deliberations about low carbon energy supply and use Visions of Energy Futures Imagining and Innovating Low Carbon Transitions unveils what the future of energy systems could look like and how their meanings are produced often alongside moments of contestation Theoretically it analyzes these technological case studies with emerging concepts from various disciplines utopianism history of technology symbolic convergence communication studies technological frames social construction of technology discursive coalitions discourse analysis and linguistics sociotechnical imaginaries science and technology studies and the sociology of expectations innovation studies future studies It draws from these cases to create a synthetic set of dichotomies and frameworks for energy futures based on original data collected across two global epistemic communities nuclear physicists and hydrogen engineers and experts in Eastern Europe and the Nordic region stakeholders in South Africa and newspapers in the United Kingdom This book is motivated by the premise that tackling climate change via low carbon energy systems and practices is one of the most significant challenges of the twenty first century and that success will require not only new energy technologies but also new ways of understanding language visions and discursive politics The discursive creation of the energy systems of tomorrow are propagated in polity hoping to be realized as the material fact of the future but processed in conflicting ways with underlying tensions as to how contemporary societies ought to be ordered This book will be essential reading for students and scholars of energy policy energy and environment and technology assessment [Nuclear Fuel and Waste: the Report of the Blue Ribbon Commission on America's Nuclear Future, Senate Hearings, Comprehensive Information on Yucca Mountain, Fukushima, Reactors, Radiation Issues](#) Department of Energy (DOE),Blue Ribbon Commission on America's Nuclear Future,U. S. Government,2017-05-10 This reproduction of the full report of the Blue Ribbon Commission on America s Nuclear Future BRC issued in 2012 provides comprehensive information on the management of the nuclear reactor fuel cycle and the disposal of radioactive waste with insights provided by the Fukushima accident Senate hearings about the report are also

included The executive summary states America s nuclear waste management program is at an impasse The Obama Administration s decision to halt work on a repository at Yucca Mountain in Nevada is but the latest indicator of a policy that has been troubled for decades and has now all but completely broken down The approach laid out under the 1987 Amendments to the Nuclear Waste Policy Act NWPA which tied the entire U S high level waste management program to the fate of the Yucca Mountain site has not worked to produce a timely solution for dealing with the nation s most hazardous radioactive materials The United States has traveled nearly 25 years down the current path only to come to a point where continuing to rely on the same approach seems destined to bring further controversy litigation and protracted delay The Blue Ribbon Commission on America s Nuclear Future the Commission was chartered to recommend a new strategy for managing the back end of the nuclear fuel cycle We approached this task from different perspectives but with a shared sense of urgency Put simply this nation s failure to come to grips with the nuclear waste issue has already proved damaging and costly and it will be more damaging and more costly the longer it continues damaging to prospects for maintaining a potentially important energy supply option for the future damaging to state federal relations and public confidence in the federal government s competence and damaging to America s standing in the world not only as a source of nuclear technology and policy expertise but as a leader on global issues of nuclear safety non proliferation and security Continued stalemate is also costly to utility ratepayers to communities that have become unwilling hosts of long term nuclear waste storage facilities and to U S taxpayers who face mounting liabilities already running into billions of dollars as a result of the failure by both the executive and legislative branches to meet federal waste management commitments
