Women Letter-Writers in Tudor England James Daybell,2018-09-26 This book represents the most comprehensive study of women s letters and letter writing during the early modern period so far undertaken and acts as an important corrective to traditional ways of reading and discussing letters as private elite male and non political Based on over 3 000 manuscript letters it shows that letter writing was a larger and more socially diversified area of female activity than has been hitherto assumed In that letters constitute the largest body of extant sixteenth century women s writing the book initiates a reassessment of women s education and literacy in the period As indicators of literacy letters yield physical evidence of rudimentary writing activity and abilities document higher forms of female literacy and highlight women s mastery of formal rhetorical and epistolary conventions The book also stresses that letters are unparalleled as intimate and immediate records of family relationships and as media for personal and self reflective forms of female expression Read as documents that inscribe social and gender relations letters shed light on the complex range of women s personal relationships as female power and authority fluctuated negotiated on an individual basis Furthermore correspondence highlights the important political roles played by early modern women Female letter writers were integral in cultivating and maintaining patronage and kinship networks they were active as suitors for crown favour and operated as political intermediaries and patrons in their own right using letters to elicit influence Letters thus help to locate differing forms of female power within the family locality and occasionally on the wider political stage and offer invaluable primary evidence from which to reconstruct the lives of early modern women Resource Letters American Association of Physics Teachers,1961
