Uncertain Futures:

Uncertain Futures Alexander F. Gazmararian, Dustin Tingley, 2023-07-20 Using stories from the front lines of the energy transition this book shows how to unlock the climate impasse

Uncertain Futures Jens Beckert, Richard Bronk, 2018-07-05 Uncertain Futures considers how economic actors visualize the future and decide how to act in conditions of radical uncertainty It starts from the premise that dynamic capitalist economies are characterized by relentless innovation and novelty and hence exhibit an indeterminacy that cannot be reduced to measurable risk The organizing question then becomes how economic actors form expectations and make decisions despite the uncertainty they face This edited volume lays the foundations for a new model of economic reasoning by showing how in conditions of uncertainty economic actors combine calculation with imaginaries and narratives to form fictional expectations that coordinate action and provide the confidence to act It draws on groundbreaking research in economic sociology economics anthropology and psychology to present theoretically grounded empirical case studies These demonstrate how grand narratives central bank forward guidance economic forecasts finance models business plans visions of technological futures and new era stories influence behaviour and become instruments of power in markets and societies The market impact of shared calculative devices social narratives and contingent imaginaries underlines the rationale for a new form of narrative economics

Young People and Uncertain Futures? James Goring, Peter Kelly, 2025-08-29 Drawing on Foucault's genealogical ethos and his work on power knowledge subjects this book analyses the ways in which neo liberal education apparatuses in Australia and other high income economies frame the problem of young people and uncertain futures The book critically examines the character of the presents and futures of education training and work and of the planet that have been produced in globalising neo liberal capitalism during the last four decades and which see in the development of young people's enterprise and aspiration the solutions to multiple crises and uncertainties It analyses how and why young people's behaviours and dispositions have been made knowable in these ways and the limits and possibilities that they produce for understanding what young people must be and become The book draws on post humanist feminist studies of techno science and futures studies to explore the promise of more socially just and sustainable futures for young people A thought provoking study for scholars and students of the sociology of education and of youth and society it will be invaluable for policymakers governments NGOs educators and undergraduate and postgraduate students interested in young people and the crises of capitalism earth systems and the biosphere

uncertainty dominates the wartime scenario and affects peacetime planning as well. This report describes a set of initiatives called CLOUT (coupling logistics to operations to meet uncertainty and the threat) designed to cope with resource shortages caused by poor predictions of demand. The theater level CLOUT initiatives include: 1) lateral repair by bases that have repair capability to support bases that do not; 2) forward stockage for quick response to unsatisfied demands at bases; 3) responsive theater transportation to support lateral resupply, forward stockage, lateral and theater repair, retrograde, and distribution of assets coming into the theater; and 4) improved operating policies and decision rules in prioritizing repair assets and allocating them to bases. The wholesale or depot level CLOUT initiatives include the following: 1) responsive assured intertheater transportation; 2) enhanced flexibility, responsiveness, and relevance of the depot's repair process; and 3) distribution of serviceable assets that explicitly accounts for mission urgency and the current asset position worldwide.
