*Uncertainty in Artificial Intelligence* MKP, 2014-06-28 **Uncertainty Proceedings 1994**      **Spatial Representation and Motion Planning** Angel P. del Pobil, Miquel A. Serna, 1995-11-08 This book is devoted to the development of adequate spatial representations for robot motion planning Drawing upon advanced heuristic techniques from AI and computational geometry the authors introduce a general model for spatial representation of physical objects This model is then applied to two key problems in intelligent robotics collision detection and motion planning In addition the application to actual robot arms is kept always in mind instead of dealing with simplified models This monograph is built upon Angel del Pobil's PhD thesis which was selected as the winner of the 1992 Award of the Spanish Royal Academy of Doctors      **Time Structures** Elzbieta Hajnicz, 1996-03-20 The notion of time plays an important role in modern science In computer science and artificial intelligence the parameter of time is of particular importance e g for planning robot activity natural language processing and time varying scene analysis This work investigates the relationship between classic first order theories of point and interval based time structures modal logics of corresponding structures and their algorithmic representations To make this relationship complete a formalisation of Allen's famous algorithm applicable to various structures of time is presented along with its translation to modal logics All in all the book is a competent and comprehensive analysis of logical descriptions and algorithmic representations of time structures      **Quantitative Evaluation of Computing and Communication Systems** Heinz Beilner, Falko Bause, 1995-09-13 This book constitutes the proceedings of the 8th International Conference on Modelling Techniques and Tools for Computer Performance Evaluation Performance Tools 95 and of the 8th GI ITG Conference on Measuring Modelling and Evaluating Computing and Communication Systems MMB 95 held jointly in Heidelberg Germany in September 1995 The volume presents 26 full refereed papers selected from a total of 86 submissions together with two invited contributions The scope of the papers includes measurement and model based approaches for quantitative systems assessment reports on theoretical and methodological progress and novel and improved assessment techniques and their tool implementations and applications      **Connectionist, Statistical and Symbolic Approaches to Learning for Natural Language Processing** Stefan Wermter, Ellen Riloff, Gabriele Scheler, 1996-03-15 This book is based on the workshop on New Approaches to Learning for Natural Language Processing held in conjunction with the International Joint Conference on Artificial Intelligence IJCAI 95 in Montreal Canada in August 1995 Most of the 32 papers included in the book are revised selected workshop presentations some papers were individually solicited from members of the workshop program committee to give the book an overall completeness Also included and written with the novice reader in mind is a comprehensive introductory survey by the volume editors The volume presents the state of the art in the most promising current approaches to learning for NLP and is thus compulsory reading for researchers in the field or for anyone applying the new techniques to challenging real world NLP problems      KORSO: Methods, Languages, and Tools for the Construction of

Correct Software Manfred Broy, Stefan Jähnichen, 1995-11-08 This book constitutes the final report of the work carried out in the project KORSO Korrekte Software funded by the German Federal Ministry for Research and Technology KORSO is an evolutionary prototype oriented project aimed at improving the theoretical foundations of quality driven software engineering and at implementing known techniques for applications of practical relevance The 21 strictly refereed papers presented are organized in five sections on methods for correctness languages development systems and logical frameworks tools and case studies In addition the preface and introductory paper give valuable background information and a concise state of the art overview

**Trends in Natural Language Generation - An Artificial Intelligence Perspective** Giovanni Adorni, Michael Zock, 1996-03-13 This proceedings volume gives an up to date overview of the most recent results in the field of plant molecular response to environmental constraints especially heat cold water drought salt or light It centers on molecular approaches in understanding the bases of plant tolerance to physical stresses links among different environmental stresses and the manipulation of gene expression by recombinant DNA technology to obtain tolerant transgenic plants
