

NEEDED UNSPOKEN PRAYER REQUEST

“Everlasting God,

I bring this unspecified prayer request before You, for You are the Most High. Lord, You know what happens in everyone’s life even when we don’t speak it out.

Today, may You intervene in everyone’s unsaid supplication and restore their happiness.

Remind them that Your Holy Spirit is always by their side in whatever concern this is not any different. May You surround them with Your angels in this difficult moment so they may not feel overwhelmed.

Thank You, God.

Amen”

Havens, CPA; Dr. Joseph S. Paul,2005-02-09 This book is designed to assist you in recognizing that you as a professional are running your own personal company and that this company s success your success will be determined by the amount of time and resources that you invest in yourself That investment will then grow according to the values you set for your company The professionals who understand and grasp this concept are empowered to right track their professional careers from Day One It is one of the most powerful concepts for you to understand as a professional If you will invest a couple of hours in your personal company and learn about the 13 principles of creating value that we have disclosed in this book you will dramatically increase your effectiveness your self confidence and your satisfaction And above all you will find the right track for your professional career You will do great things when you take ownership of your company and implement a plan of action that is based upon the 13 principles of creating value Creating Value in engaging enjoyable and practical In an era of spin this is straight talk and action steps for positive career development Dick Cowart President American Health Lawyers Association **What's Your Story** Toben Heim,Joanne Heim,1999 One of the ways we get to know other people is by telling our stories And we can get to know other people by asking them to share their stories with us But how do we do that Tell me about yourself is a little vague for most of us It s too broad and hard to answer What s Your Story is an interactive guide designed to help people tell their stories by recounting their experiences feelings values and beliefs with others Filled with questions journal pages essays and dialog What s Your Story will get you talking about and listening to the things that really matter *Observational Listening* Markus van Alphen,2016-07-27 Conversational skills People already talk with one another dont they It should be redundant to write a book about conversational skillsor so you would think Yet there are differences between people one seems to get a little more done than the next Often this boils down to subtle differences in the way they communicate Ordinarily people tend to ask questions with a certain goal or purpose in mind They then listen to the answer as if the answer is based on the question as they meant it to be Yet the other is answering based on what he understood the question to mean Observational listening trains the listener to let go of his own goals and interpretations and concentrate on the reactions evoked In other words the listener tries to find out what the question meant to the other In this way he gets it and is able to bring depth into the conversation in a natural way without resorting to tricks This book also goes further than your everyday conversation it is directed at conversational skills in psychosocial settings The philosophy behind the book is simple yet profound if you realise that communication is an emotion as well as the expression of emotion the way to becoming an excellent communicator is to understand emotion and how it translates into behaviour This is what makes this book unique it provides the missing link between emotion and

communication **An Emotional History of the United States** Peter N. Stearns, Jan Lewis, 1998 Emotions lie at our very core as human beings How we process and grapple with our emotions how and what we emote and how we respond to the emotions of others constitute the essence of our social universe In a very real sense we exist only through the prism of our emotions And yet the profound effect of human emotion on history politics religion and culture remains underexamined While the influence of emotion in such realms as American foreign policy has been well documented other emotional aspects of American history have escaped notice What role for instance does emotion have in the practice of African American religion How do shame and self hatred influence American conceptions of identity How does our emotional life change as we age To what degree is American consumerism driven by basic human emotion With this landmark anthology historians Peter N Stearns and Jan Lewis provide a road map of the American emotional landscape From the emotional world of working class Massachusetts to the prayers of evangelical and pentecostal women and the gendered nature of black rage these essays provide a multicultural snapshot of the unique nature and evolution of American emotions **Matthew West & Don't Stop**
