Warboys, 1994-01-26 The software process is the total set of software engineering activities necessary to develop and maintain software products Software process technology SPT deals with methods formalisms and tools for supporting the software process SPT has developed into a key technology in terms of its importance to software

Object Technologies for Advanced Software Shojiro Nishio, 1993-10-07 This volume constitutes the proceedings of the First International Symposium organized by the Japan Society for Software Science and Technology The symposium was held in Kanazawa Japan November 4 6 1993 and attracted many researchers from academia and industry as well as ambitious practitioners Object technologies in particular object oriented programming object oriented databases and software object bases currently attract much attention and hold a great promise of future research and development in diverse areas of advanced software The volume contains besides 6 invited presentations by renown researchers and 25 contributed papers carefully selected by an international program committee from a total of 92 submissions **OOIS'97** Maria E. Orłowska, Roberto Zicari, 2012-12-06 This publication contains the proceedings of the 4th International Conference on Object Oriented Information Systems The first three OOIS conferences were held in London UK 1994 Dublin Ireland 1995 and again in London in 1996 In response to the Call for Papers we received 91 submissions which were reviewed by members of the Program Committee Each paper was refereed by at least three reviewers and following discussion with PC members 40 of the papers were accepted for presentation at the conference and for publication in this volume In addition to the contributions from authors this volume includes an abstract of the Keynote Speaker s presentation At OOIS 97 in Brisbane in November Dr Dan Fishman the Chief Architect for Informix Software Inc traced some of the early developments in

information systems through current day technology and further explored possible future directions and potential for object oriented information systems The papers included in the proceedings consist of various aspects of object oriented concepts and they have been presented to the reader under the following thematic sections Object Oriented Methodologies Query Processing Modelling Issues I Transaction Processing and Concurrency Control Applications Modelling Issues II Re Usability I Modelling Issues III Re usability II Architectural Issues Object Orientation in Spatial Structures Database Design and Views Software Engineering Development Large Scale Environments This conference has received tremendous support from the School of Information Technology at The University of Queensland *First Asia-Pacific Software Engineering Conference*, 1994 **International Workshop on Software Specification and Design [proceedings]**, 1993 Software Engineering Shari Lawrence Pfleeger, Joanne M. Atlee, 2006 This introduction to software engineering and practice addresses both procedural and object oriented development Is thoroughly updated to reflect significant changes in software engineering including modeling and agile methods Emphasizes essential role of modeling design in software engineering Applies concepts consistently to two common examples a typical information system and a real time system Combines theory with real practical applications by providing an abundance of case studies and examples from the current literature A useful reference for software engineers *Software Quality Management II* M.
