Kearse, 2008-02-02 The purpose of *T Cell Protocols Development and Activation* is to collect a series of protocols particularly those that have been developed within the past few years to help investigators master new techniques or improve existing ones for the study of T cell Biology Invariably in putting together a book like this it is difficult to decide which methods to include and which to leave out To this end methods were selected from a variety of disciplines including cellular immunology biochemistry and molecular biology to try to provide something of interest for everyone who works on T cell development and activation I would like to mention that my primary reason for agreeing to put this book together is that when I was a graduate student I purchased a copy of *Selected Methods in Cellular Immunology* by Mishell and Shigii which proved a tremendous help in learning the basics of one and two dimensional gel techniques and other methods The cover has long since fallen off but it still remains one of my most valued reference books for the laboratory It is my hope that *T Cell Protocols Development and Activation* will prove similarly useful to current and future scientists wishing to learn new methods for exploring the development and activation of T cells *T Cell Activation* Björn-Philipp Diercks, 2025-04-12 This volume provides detailed up to date methods used in basic and applied research on T cell activation Chapters explore the fundamentals in T cell biology a board range cutting edge techniques from initial Ca²⁺ live cell imaging to downstream effector functions in autoimmune disease Written in the format of the highly successful *Methods in Molecular Biology* series each chapter includes an introduction to the topic lists necessary materials and reagents includes tips on troubleshooting and known pitfalls and step by step readily reproducible protocols Authoritative and cutting edge T cell activation *Methods and Protocols* will be an indispensable protocol collection for researchers studying T cell activation in inflammation and immunity
