

## Intentional Corporate Social Responsibility: A Review

Abstract

This review examines the literature on intentional corporate social responsibility (CSR).

**Keywords** Intentional CSR

**Introduction**

Corporate social responsibility (CSR) has become a prominent feature of the business landscape in recent years. As a result, there has been a significant amount of research on CSR, and a variety of definitions and frameworks have been proposed. One of the most common definitions of CSR is that it is the responsibility of a company to act ethically and to contribute to the well-being of society (Carroll, 1991). This review examines the literature on intentional CSR, which is CSR that is planned and controlled by the organization (Waddock & Graves, 1997).

There are a number of reasons why intentional CSR is important. First, it allows a company to control its CSR activities and to ensure that they are aligned with its business strategy. Second, it allows a company to communicate its CSR activities to its stakeholders and to build a positive reputation. Third, it allows a company to address the needs of its stakeholders and to create value for them.

There are a number of different types of intentional CSR. Some companies focus on environmental CSR, such as reducing their carbon footprint or using sustainable materials. Other companies focus on social CSR, such as providing employee benefits or supporting community development. Still other companies focus on ethical CSR, such as ensuring that their products are safe and that they do not engage in unethical practices.

There are a number of factors that can influence a company's decision to engage in intentional CSR. These factors include the company's business strategy, its financial resources, its industry, and its stakeholders. For example, a company that is in a highly competitive industry may be more likely to engage in intentional CSR in order to differentiate itself from its competitors.

There are a number of benefits to intentional CSR. First, it can help a company to attract and retain top talent. Second, it can help a company to build a positive reputation and to increase its market value. Third, it can help a company to address the needs of its stakeholders and to create value for them. Finally, it can help a company to contribute to the well-being of society.
