Thought Without Language:

Thought Without Language Lawrence Weiskrantz, 1988 Based on a Fyssen Foundation symposium in 1987 these essays question the dependency of thought on language and whether abstract reasoning and other faculties can exist in the absence of language

The Psychology of Human Thought Robert J. Sternberg, Edward E. Smith, 1988-02-26 The Mutual Cultivation of Self and Things Yang Guorong, 2016-04-15 Yang Guorong is one of the most prominent Chinese philosophers working today and is best known for using the full range of Chinese philosophical resources in connection with the thought of Kant Hegel Marx and Heidegger In The Mutual Cultivation of Self and Things Yang grapples with the philosophical problem of how the complexly interwoven nature of things and being relates to human nature values affairs and facts and ultimately creates a world of meaning Yang outlines how humans might live more fully integrated lives on philosophical religious cultural aesthetic and material planes This first English translation introduces current influential work from China to readers worldwide

Linguistics Inside Out George Wolf, Nigel Love, 1997-02-13 Roy Harris s thoroughgoing attack on the presuppositions underpinning the dominant traditions of Western thought about language and his advocacy of a radically reconceived linguistics focused on the idea that the linguistic sign is contextually created and interpreted as a function of the meaningful integration of communicative behaviour have made him one of the most controversial figures in the field today In the essays in this volume Naomi S Baron Bob Borsley Philip Carr David Fleming Rom Harr Anthony Holiday John E Joseph Frederick J Newmeyer David R Olson Trevor Pateman John S ren Pettersson and John R Taylor offer a critical examination of various aspects and implications of Harris s views in reponse to which Harris contributes an article that both engages with his critics and develops some of the major themes of his work

Agatha ,1862 *Attractions of Thought* Richard John Koscijew, 2018-06-28 We began by perceiving the world through the lenses of symbolic categories to construct similarities and differences in terms of categorical oppositions and to organize our lives according to themes and narratives Living in this new symbolic universe the modern humans had a large compulsion to codify and then recodify their experiences to translate everything into representation and to seek out the deeper hidden logic that eliminates inconsistencies and ambiguities The appending presumption is that sometimes it is taken for granted as fact However its decisions are based on the fundamental principles whose assumptions are based on or upon the nature of which were presented by surmising of the one to one correspondence having to exist between every element of physical reality and physical theory This may serve to bridge the gap between mind and world for those who use physical theories But it also suggests that the Cartesian division is inseparably integrated and structurally real least of mention as impregnably formidable for physical reality as it is based on ordinary language That explains in no small part why the radical separation between mind and world as sanctioned by classical physics and formalized by Descartes yet it remains as philosophical postmodernism attests as one of the most pervasive features of Western intellectual thought
