*Winning French Minds* Denis Courtois,2023-02-23 every chapter of *Winning French Minds* delivered something new not only because French language radio being a less frequented area of study but also due to the author s ability to tie these radio efforts to events surrounding the French people and events unfolding on the European geopolitical stage World War II Database World War II was very much a war of the radios A relatively new technology radio as a tool was exploited by all of the participants of the war to win the hearts and minds of the people and to steer public opinion The period 1940 to 1942 was the most volatile of the war with the Nazis capturing large parts of western Europe and dominating on the Eastern front At this time France was separated into two nominally independent zones and public opinion could easily have been swayed in favor of the New German Order This could have had potentially disastrous consequences for any future Allied attempt to liberate Europe and so the battle for French minds was launched using the new technology of radio This narrative of that campaign develops chronologically through a series of topics including major military incidents youth food family psychological warfare sports and work as presented by different radio stations in particular Radiodiffusion controlled by Vichy France Radio Paris controlled by the Nazis and the BBC offering a systematic comparative analysis of radio propaganda messages and building a vivid picture of the evolution of broadcasts in the context of the complex political and social impact of the war on the French population Using original primary sources from archives in Britain and France broadcast recordings radio magazines and interviews conducted by British Intelligence with those arriving from France during the war this is a fascinating and unique insight into wartime radio propoganda from 1940 to 1942
