Technology Interactions:

Adaptive Perspectives on Human-Technology Interaction Alex Kirlik, 2006-05-04 In everyday life and particularly in the modern workplace information technology and automation increasingly mediate, augment, and sometimes even interfere with how humans interact with their environment. How to understand and support cognition in human technology interaction is both a practically and socially relevant problem. The chapters in this volume frame this problem in adaptive terms: How are behavior and cognition adapted or perhaps ill adapted to the demands and opportunities of an environment where interaction is mediated by tools and technology? The authors draw heavily on the work of Egon Brunswik, a pioneer in ecological and cognitive psychology, as well as on modern refinements and extensions of Brunswikian ideas, including Hammond's Social Judgment Theory, Gigerenzer's Ecological Rationality, and Anderson's Rational Analysis. Inspired by Brunswik's view of cognition as coming to terms with the casual texture of the external world, the chapters in this volume provide quantitative and computational models and measures for studying how people come to terms with an increasingly technological ecology and provide insights for supporting cognition and performance through design, training, and other interventions. The methods, models, and measures presented in this book provide timely and important resources for addressing problems in the rapidly growing field of human technology interaction. The book will be of interest to researchers, students, and practitioners in human factors, cognitive engineering, human-computer interaction, judgment and decision making, and cognitive science.

Technology in the ICU, An Issue of Critical Care Nursing Clinics of North America Shu-Fen Wung, 2018-05-11 Dr. Wung is addressing an important component of critical care nursing: the role of technology in patient care. She has assembled top authors to provide current clinical information in the following areas: Sensory overload and technology in critical care; Alarm fatigue; Nurse-technology interactions; Safety steps to prevent infusion errors; Product design and medical devices for nurses; Technologies to assess physiologic parameters: hemodynamics, cardiac output; Technologies to support hemodynamics, e.g., balloon pump, ECMO, etc.; Interactive computer programs for application of critical thinking skills; Information technology: Electronic health records (EHR), real-time detection of clinical care deviations in ICU, Medication safety technology, and eICU; iCARE. Readers will come away with the updates they need to improve patient outcomes.

Learning Technologies and User Interaction Kay K. Seo, Scott Gibbons, 2021-09-27 *Learning Technologies and User Interaction* explores the complex interplay between educational technologies and those who rely on them to construct knowledge and develop skills. As learning and training continue to move onto digital platforms, tools such as artificial intelligence, predictive analytics, video games, virtual reality, and more hold considerable potential to foster advanced forms of synergy across contexts. Showcasing a variety of contributors who are attuned to today's networked technologies, environments, and learning dynamics, this book is ideal for students and scholars of educational technology, instructional design, professional development, and research methods.
