Two Adolescents:

Two Adolescents Alberto Moravia, 1999-05-01 Two novels by Alberto Moravia display his gifts as a teller of stories sharp with characterization and deep understanding Agostino is the story of a sensitive cloistered boy who beyond all sense of proportion loves and idolizes his youthful widowed mother The shock of finding he is not the center of his mother's universe is more than Agostino can stand In an instinctive fumbling effort to gain self respect and values Agostino joins a gang of older boys who derisively and callously supply him with a quick and drastic sexual education Agostino finds he has won knowledge without wisdom and in the words of Moravia He has lost his first estate without having succeeded in winning another Luca is more sophisticated knowing and introspective When his active mind questions the conventions and routine of everyday life he comes gradually to the conclusion that life is a monstrous conspiracy a plot to make one conform at the expense of one's soul His answer is a complete negation of the pattern of living an austere and adolescent reaction that leads him unwittingly to the brink of death itself and from which only the purge of violent illness and an unexpected romance save him mentally and physically and show him the way to maturity [Two Adolescents](#) Alberto Moravia, 1960 **Two Adolescents**, 1950

Galdikas, R.D. Nadler, N. Rosen, Lori K. Sheeran, 2013-11-11 The

orangutan is the most highly endangered species of great ape. Orangutans are threatened by deforestation, poaching, the illegal pet trade, and the isolation and fragmentation of dwindling wild populations. Their conservation is impeded by certain aspects of their ecology, e.g., a rain forest habitat and certain features of their life history, e.g., an eight to twelve year interbirth interval. Added to the U.S. Endangered Species List in 1970, the orangutan is now clearly on the road to extinction. The number of wild orangutans in Borneo and Sumatra is currently estimated to have decreased to between 12,300 and 20,571 individuals. Only 2% of original orangutan habitat is protected, and some of these areas are now being destroyed. Clearly, attention to ecology, demography, censusing, rehabilitation, and conservation is essential if the orangutan is to survive in the wild beyond the next century. The protection of orangutans is a complex, multifaceted problem involving such pressing issues as human poverty, overpopulation, and the economic development of Southeast Asia. Although the orangutan has been placed in Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), more orangutans were sold illegally in Taiwan between 1990 and 1993 than are housed in all the world's zoos. In the past, scientific and public attention has centered on the African apes. For this reason, the sole Asian great ape, the orangutan, has been called the neglected ape.

Emotional Regulation and Human Flourishing: Theoretical and Empirical Perspectives

Claudia Navarini, Blaine Fowers, Juan Andrés Mercado, Angelo Panno, Pía Valenzuela, 2025-04-01. Several authors, i.e., Scheler, Arnold, Goldie, Keltner, and Ekman, agree that traditionally in the history of Western thought, emotions have been seen as enemies of rationality and disruptive of cooperative social relations. However, emotions guide our perceptions of the world, our memories of the past, and even our moral judgments of right and wrong, most typically in ways that enable effective responses to the current situation. For example, studies find that when we are angry, we are acutely attuned to what is unfair, which helps animate actions that remedy injustice. Emotions structure, not just colour, diverse social interactions, such as attachment between parents and children, flirtations, and negotiations between rivals. Thus, emotions organize rather than disrupt rational thinking. According to Arnold, positive or negative, we need to deal with emotions. We need to think about them and what they tell us. As Williams poses, the moral significance of emotions reveals how fact and value come together in the moral agent. Human beings' capacity for ethics arises from the intersection between reason and emotion.
