

What is **Psychoanalysis**?

Psychoanalysis is a psychological theory developed by Sigmund Freud. It focuses on exploring the unconscious to understand and treat mental disorders.

It emphasizes concepts such as the unconscious, dream interpretation, and the significance of childhood in psychological development.

Through therapeutic dialogue, psychoanalysis aims to unravel underlying conflicts and thought patterns, promoting self-awareness and emotional change.

While it has influenced contemporary psychology, its methods and approaches have been the subject of debate and evolution over time.

Why Psychoanalysis? Alenka Zupančič, 2008 In *Why Psychoanalysis* Alenka Zupancic outlines the relationship between the ontological the ethical and the aesthetical spheres of Freudian and Lacanian psychoanalysis In three bold interventions she investigates the question of Being Freedom and Comedy Taking her departure from issues of sex cause and horror Zupancic reinterprets Kant s philosophical categories and outlines a unique theory of the subjekt *Why Psychoanalysis* continues her seminal work *Ethics of the Real* Kant and Lacan from 2000 and links it with more recent work about comedy *Why Psychoanalysis* is suitable for beginners as well as for more advanced readers

Why Psychoanalysis? Elisabeth Roudinesco, 2004-03-10 Why do some people still choose psychoanalysis Freud s so called talking cure when numerous medications are available that treat the symptoms of psychic distress so much faster Elisabeth Roudinesco tackles this difficult question exploring what she sees as a depressive society an epidemic of distress addressed only by an increasing reliance on prescription drugs Far from contesting the efficacy of new medications like Prozac Zoloft and Viagra in alleviating the symptoms of any number of mental or nervous conditions Roudinesco argues that the use of such drugs fails to solve patients real problems In the man who takes Viagra without ever wondering why he is suffering from impotence and the woman who is given antidepressants to deal with the loss of a loved one Roudinesco sees a society obsessed with efficiency and desperate for the quick fix She argues that the talking cure and pharmacology represent not just different approaches to psychiatry but different worldviews The rush to treat symptoms is itself symptomatic of an antiseptic and depressive culture in which thought is reduced to the firing of neurons and desire is just a chemical secretion In contrast psychoanalysis testifies to human freedom and the power of language

Explorations in Psychoanalytic Ethnography Jadran Mimica, 2007-05-01 Whereas most anthropological research is grounded in social cultural and biological analysis of the human condition this volume opens up a different

approach its concerns are the psychic depths of human cultural life worlds as explored through psychoanalytic practice and or the psychoanalytically framed ethnographic project In fact some contributors here argue that the anthropological interpretation of human existence is not sustainable without psychoanalysis others take a less extreme radical stance but still maintain that the unconscious matrix of the human psyche and of the intersubjective social reality of any given cultural life world is a vital domain of anthropological and sociological inquiry and understanding *The Psychoanalytic Review*, 1922

The Still Small Voice Donald L. Carveth, 2018-05-01 Whereas Freud himself viewed conscience as one of the functions of the superego in *The Still Small Voice* Psychoanalytic Reflections on Guilt and Conscience the author argues that superego and conscience are distinct mental functions and that therefore a fourth mental structure the conscience needs to be added to the psychoanalytic structural theory of the mind He claims that while both conscience and superego originate in the so called pre oedipal phase of infant and child development they are comprised of contrasting and often conflicting identifications The primary object still most often the mother is inevitably experienced as on the one hand nurturing and soothing and on the other as frustrating and persecuting Conscience is formed in identification with the nurturer the superego in identification with the aggressor There is a principle of reciprocity at work in the human psyche for love received one seeks to return love for hate hate the talion law *Unlearning* Charles L.
