[Defending Assessment Security in a Digital World](#) Phillip Dawson,2020-10-26 Defending Assessment Security in a Digital World explores the phenomenon of e cheating and identifies ways to bolster assessment to ensure that it is secured against threats posed by technology Taking a multi disciplinary approach the book develops the concept of assessment security through research from cybersecurity game studies artificial intelligence and surveillance studies Throughout there is a rigorous examination of the ways people cheat in different contexts and the effectiveness of different approaches at stopping cheating This evidence informs the development of standards and metrics for assessment security and ways that assessment design can help address e cheating Its new concept of assessment security both complements and challenges traditional notions of academic integrity By focusing on proactive principles based approaches the book equips educators technologists and policymakers to address both current e cheating as well as future threats

Probabilistic Tsunami Hazard and Risk Analysis Mathilde B. Sørensen,Jörn Behrens,Fatemeh Jalayer,Finn Løvholt,Stefano Lorito,Irina Rafliana,Mario A. Salgado-Gálvez,Jacopo Selva,2026-03-03 This is an open access book Probabilistic tsunami hazard and risk assessment abbreviated as PTHA and PTRA respectively has evolved quickly over the past 10 to 15 years and now forms the basis of many risk mitigation efforts Methods are largely based on those used for probabilistic hazard and risk assessment for earthquakes However while seismic risk can be represented by a single workflow tsunami risk is characterized by a number of different and cascading workflows Funded in parts by the COST Action CA18109 AGITHAR 2019 2023 a group of more than 120 experts gathered to advance the scientific basis for PTHA and PTRA Amongst them were over 50 volunteering to contribute to this so called cookbook for PTHA and PTRA The aim of our cookbook is to give an overview of existing methods for PTHA and PTRA to unify the description of named workflows and

to make best practices examples available to a wider community We use the analogy of a cookbook because we strive to describe the ingredients i e the basic building blocks of PTHA and PTRR and give examples of good recipes i e well designed workflows for concrete application fields Furthermore a cookbook gives inspiration but does not necessarily standardize methods So while this effort aims at some standardization of methodology it gives enough freedom to build on this knowledge to further develop the field The book is intended for scientists but also practitioners and decision makers in tsunami hazard and risk mitigation

Strategic Market Management David A.
