

# CONDITIONED RESPONSE

In behavioral psychology, a conditioned response refers to a response to a stimulus that is developed following training that involves reward and punishment.

## DEFINITION

A conditioned response is a learned response to a specific stimulus that is acquired through repeated association with another stimulus that already elicits a certain response. It occurs when a neutral stimulus comes to evoke a response after being paired with a stimulus that naturally produces that response.

## EXAMPLES

**Dog Training:** The sound of a whistle causes a dog to salivate due to repeated association with being fed.

**Dentist Office:** Feeling anxious at a dentist's office due to repeated association with pain and discomfort.

**Fast Food:** You automatically feel hungry when you see a restaurant's sign due to repeated association with the taste of their food.

# Terms Of Response
