**The Language of Argumentation** Ronny Boogaart, Henrike Jansen, Maarten van Leeuwen, 2021-01-20 Bringing together scholars from a broad range of theoretical perspectives The Language of Argumentation offers a unique overview of research at the crossroads of linguistics and theories of argumentation In addition to theoretical and methodological reflections by leading scholars in their fields the book contains studies of the relationship between language and argumentation from two different viewpoints While some chapters take a specific argumentative move as their point of departure and investigate the ways in which it is linguistically manifested in discourse other chapters start off from a linguistic construction trying to determine its argumentative function and rhetorical potential The Language of Argumentation documents the currently prominent research on stylistic aspects of argumentation and illustrates how the study of argumentation benefits from insights from linguistic models ranging from theoretical pragmatics politeness theory and metaphor studies to models of discourse coherence and construction grammar

**The Language of Argument** Daniel Lamont McDonald, 1996 [Evaluating the Language of Argument](#) Martin Hinton, 2020-11-30 This book is concerned with the evaluation of natural argumentative discourse and in particular with the language in which arguments are expressed It introduces a systematic procedure for the analysis and assessment of arguments which is designed to be a practical tool and may be considered a pseudo algorithm for argument evaluation The first half of the book lays the theoretical groundwork with a thorough examination of both the nature of language and the nature of argument This leads to a definition of argumentation as reasoning expressed within a procedure which itself yields the three frames of analysis used in the evaluation procedure Process Reasoning and Expression The second half begins with a detailed discussion of the concept of fallacy with particular attention on fallacies of language their origin and their effects A new way of looking at fallacies emerges from these chapters and it is that conception together with the understanding of the nature of argumentation described in earlier sections which ultimately provides the support for the Comprehensive Assessment Procedure for Natural Argumentation The first two levels of this innovative procedure are outlined while the third that dealing with language and involving the development of an Informal Argument Semantics is fully described The use of the system and its power of analysis are illustrated through the evaluation of a variety of examples of argumentative texts

**Argumentation and Language – Linguistic, Cognitive and Discursive Explorations** Steve Oswald,Thierry Herman,Jérôme Jacquin,2018-03-08 This volume focuses on the role language plays at all levels of the argumentation process It explores the effects that specific linguistic choices may have in the production and the reception of arguments and in doing so it moves beyond the first necessary descriptive stance provided by current literature on the topic Each chapter provides an original take illuminating one or more of the following three issues the range of linguistic resources language users draw on as they argue how cognitive processes of meaning construction may influence argumentative practices and which discursive devices can be used to fulfil a number of argumentative goals The volume includes theoretical and empirical or applied stances providing the reader both with state of the art reflections on the relationship between argumentation and language and with concrete examples of how this relationship plays out in naturally occurring argumentative practices such as classroom interaction and political parliamentary or journalistic discourse This is a very original timely and welcome contribution to the study of argumentation conducted with the tools of the language sciences The collection of papers

relevantly tackles key linguistic discursive and cognitive aspects of argumentative practices whose treatment is underrepresented in mainstream argumentation studies by offering new and exciting linguistically grounded theoretical accounts As such the volume testifies both to the vigour of the linguistic current within the discipline and to the high standards of scholarly commitment and quality that the younger generation is pushing forward Without question this book marks an important milestone in the relationships between linguistics and argumentation theory Christian Plantin Professor Emeritus
