Logical Issues in Language Acquisition I. M. Roca, 2019-11-18 No detailed description available for Logical Issues in
Language Acquisition *The Bilingual Child* Virginia Yip, Stephen Matthews, 2007-08-27 How does a child become bilingual
The answer to this intriguing question remains largely a mystery not least because it has been far less extensively researched
than the process of mastering a first language Drawing on new studies of children exposed to two languages from birth
English and Cantonese this book demonstrates how childhood bilingualism develops naturally in response to the two
languages in the children s environment While each bilingual child s profile is unique the children studied are shown to
develop quite differently from monolingual children The authors demonstrate significant interactions between the children s
developing grammars as well as the important role played by language dominance in their bilingual development Based on
original research and using findings from the largest available multimedia bilingual corpus the book will be welcomed by
