Extreme Programming and Agile Processes in Software Engineering Michele Marchesi,Giancarlo Succi,2003-08-03 This book contains most of the papers presented at the 4th International Conference on Extreme Programming and Agile Processes in Software Engineering XP 2003 held in Genoa Italy May 2003 The XP 200n series of conferences were started in 2000 to promote the change of new ideas research and applications in the emerging field of agile methodologies for software development Over the years the conference has come the main world forum for all major advances in this important field Also this year the contributions to Agile Methodologies and Extreme Programming were substantial They demonstrate that the topic is continuing to gain more and more momentum In spite of some criticism of agile methodologies everyone agrees that they address some unresolved needs of software practitioners People still do not know how to develop software on time with the desired features and within the given budget This volume is divided into several thematic sections easing reader's navigation through the content Full papers are presented first followed by research reports papers from the Educational Symposium and papers from the Ph D Symposium The presentations given during three panel sessions held at the conference conclude the book The section on Managing Agile Processes includes contributions highlighting the sometimes difficult relationship between agile methodologies and management and includes approaches and suggestions that should facilitate the acceptance of agile methodologies at the different levels of management

Extreme Programming and Agile Processes in Software Engineering Hubert Baumeister,Michele Marchesi, Mike Holcombe,2005-05-24 Extreme Programming has come a long way since its first use in the C3 project almost 10 years ago Agile methods have found their way into the mainstream and at the end of last year we saw the second edition of Kent Beck's book on Extreme Programming containing a major refactoring of XP This year the 6th International Conference on Extreme Programming and Agile Processes in Software Engineering took place June 18-23 in Sheffield As in the years before XP 2005 provided a unique forum for industry and academic professionals to discuss their needs and ideas on Extreme Programming and agile methodologies These proceedings reflect the activities during the conference which ranged from presentation of research papers invited talks posters and demonstrations panels and activity sessions to tutorials and workshops included are also papers from the Ph D and Master's Symposium which provided a forum for young researchers to present their results and to get feedback As varied as the activities were the topics of the conference which covered the presentation of new and improved practices empirical studies experience reports and case studies and last but not least the social

aspects of agile methods The papers and the activities went through a rigorous reviewing process Each paper was reviewed by at least three Program Committee members and was discussed carefully among the Program Committee

Of 62 papers submitted only 22 were accepted as full papers [Software Testing](#) Srinivasan Desikan, Gopalaswamy Ramesh, 2006 Software Testing Principles and Practices is a comprehensive treatise on software testing It provides a pragmatic view of testing addressing emerging areas like extreme testing and ad hoc testing Resource description page

Extreme Programming Refactored Matt Stephens, Doug Rosenberg, 2003-08-13 Extreme Programming Refactored The Case Against XP featuring Songs of the Extremos takes a satirical look at the increasingly hyped extreme programming XP methodology It explores some quite astonishing Extremo quotes that have typified the XP approach quotes such as XPers are not afraid of oral documentation Schedule is the customer s problem Dependencies between requirements are more a matter of fear than reality and Concentration is the enemy In between the chuckles though there is a serious analysis of XP s many flaws The authors also examine C3 the first XP project whose team most of whom went on to get XP book deals shortly before C3 s cancellation described themselves as the best team on the face of the Earth In a later chapter the authors also note that one problem which can affect pair

programmers is overconfidence or is that excessive courage The authors examine whether the problems that led to C3's inexplicable cancellation could also afflict present day XP projects In the final chapter Refactoring XP Matt and Doug suggest some ways of achieving the agile goals of XP using some XP practices used in moderation combined with other less risk laden methods
