Deborah Blythe Doroshov, 2019-04-26 Before the 1940s children in the United States with severe emotional difficulties would have had few options for care The first option was usually a child guidance clinic within the community but they might also have been placed in a state mental hospital or asylum an institution for the so called feebleminded or a training school for delinquent children Starting in the 1930s however more specialized institutions began to open all over the country Staff members at these residential treatment centers shared a commitment to helping children who could not be managed at home They adopted an integrated approach to treatment employing talk therapy schooling and other activities in the context of a therapeutic environment Emotionally Disturbed is the first work to examine not only the history of residential treatment but also the history of seriously mentally ill children in the United States As residential treatment centers emerged as new spaces with a fresh therapeutic perspective a new kind of person became visible the emotionally disturbed child Residential treatment centers and the people who worked there built physical and conceptual structures that identified a population of children who were alike in distinctive ways Emotional disturbance became a diagnosis a policy problem and a statement about the troubled state of postwar society But in the late twentieth century Americans went from pouring private and public funds into the care of troubled children to abandoning them almost completely Charting the decline of residential treatment centers in favor of domestic care based models in the 1980s and 1990s this history is a must read for those wishing to understand how our current child mental health system came to be **The Disturbed Child** Pearl Henriette Berkowitz, Esther Rothman, 1960 *The Emotionally Disturbed Child* Harold D. Love, 1970 **The Emotionally Disturbed Child** Larry A. Faas, 1970 Residential Treatment for the Disturbed Child Herschel Alt, 1960 The Child, 1966 The disturbed child Trina Rivera del Río, 1971 **The Social Psychology of the Child with Epilepsy** Christopher Bagley, 2015-06-19 When this title was first published in 1971 there were about 300 000 people with epilepsy in England and Wales Nearly one third of them were children This book is an integrated review of how epileptic children behaved and of how they were regarded by parents teachers and peers at the time Written by a sociologist with a training in psychology human biology and education the book draws on several disciplines sociology psychology biology in seeking to understand the complex determinants of deviant behaviour in children with epilepsy The author considers in detail the lives of 118 epileptic children bringing together and analysing a wide range of measurements of behaviour social relations and abnormalities of brain function He discusses how the children fare in school and how epilepsy affects both the teacher s perception of the child and the child s scholastic performance The dearth of medical centres which could diagnose and treat epilepsy at the time is examined and hospital use according to parents social class is analysed The author looks at the role of parents of

epileptic children and shows that their attitude to epilepsy is of major importance for the child's adjustment. The prejudice to which epileptic children and adolescents were subjected by the world at large is chronicled in detail. Finally the author considers how his empirical material makes a contribution to the theoretical problem of integrating sociology, psychology and biology into a single discipline concerned with the explanation of human social behaviour. **Approaches with**
