The Adirondack Architecture Guide, Southern-Central Region Janet A. Null, 2017-06-01 Explores the architectural treasures of the Southern Central region of New York's Adirondack Park and places them in the context of Adirondack history and culture. The Adirondack Architecture Guide Southern Central Region provides a professional and insightful survey of the built environment of a unique area within New York's Adirondack Park. This book is the first field guide to the architecture of the Park, revealing the ordinary and the extraordinary, the remarkable buildings by prominent designers as well as the hidden, unexpected gems few know exist. Based on more than seven thousand miles of fieldwork and years of research, the guide comprises more than seven hundred sites traversing the geographic range, socioeconomic strata, and historical span of the region from the late 1700s to the present. Organized according to clearly marked travel routes and fourteen tours on the ground and on the water, it features detailed maps and coordinates for each site along with many beautiful photographs. Also included are eleven companion essays drawing on the expertise of professionals, local historians, and Adirondack residents that delve into the what, where, and why people built in the Adirondacks. In *The Adirondack Architecture Guide*, beloved landmarks share the pages with little-known architectural gems through a series of curated tours. Each one tracks the history and development of the Southern Central Adirondacks through its fascinating buildings, bridges, and byways. From first-time visitors to longtime residents, readers will find it packed with information designed to make the most of a side trip lasting a few hours or a weekend of exploring. This is a must-have source to guide your travels in one of the most beautiful and historic parts of New York: the Adirondack Park. Jay A. DiLorenzo, President, Preservation League of New York State. This remarkable book presents architecture broadly defined to include all man-made structures as the key to understanding the history and culture of a vast National Historic Landmark. We are introduced to the sublime Chestertown Church of the Good Shepherd, the delightful Custard's Last Stand, the earnest Wakely Mountain Fire Tower, and the grand aspirations of the Mary Persons House. A detailed picture of two hundred years in a region of romantic wilderness, industry, tourism, and everyday life emerges to offer a compelling vision of a unique place. This guide is not only for architecture buffs and explorers; it is a model of historical research that presents an unbiased picture of the rich diversity of a fascinating region. Frances Halsband, Kliment Halsband Architects. *Modern Building Record*, 1911.

The Harpsichord Owner's Guide Edward L. Kottick, 1987. Kottick presents technical information in an accessible but entertaining way: the forms and styles of harpsichords, advice on purchasing decisions, maintenance techniques such as voicing, regulating, and changing strings, tongues, plectra, springs, and... **Audels Masons and Builders Guide** Frank Duncan Graham, Thomas J. Emery, 1924.

Houses from Books Daniel D. Reiff, 2010-11-01. Many homes across America have designs based on plans taken from pattern books or mail-order catalogs. In *Houses from Books*, Daniel D. Reiff traces the history of published plans and offers the first comprehensive survey of their influence on the structure and the style of American houses from 1738 to 1950. *Houses from Books* shows that architectural publications from Palladio's *I Quattro Libri* to Aladdin's *Ready-Cut Homes* played a

decisive role in every aspect of American domestic building Reiff discusses the people and the firms who produced the books as well as the ways in which builders and architects adapted the designs in communities throughout the country His book also offers a wide ranging analysis of the economic and social conditions shaping American building practices As architectural publication developed and grew more sophisticated it played an increasingly prominent part in the design and the construction of domestic buildings In villages and small towns which often did not have professional architects the publications became basic resources for carpenters and builders at all levels of expertise Through the use of published designs they were able to choose among a variety of plans styles and individual motifs and engage in a fruitful dialogue with past and present architects Houses from Books reconstructs this dialogue by examining the links between the published designs and the houses themselves Reiff s book will be indispensable to architectural historians architects preservationists and regional historians Realtors and homeowners will also find it of great interest A catalog at the end of the book can function as a guide for those attempting to locate a model and a date for a particular design Houses from Books contains a wealth of photographs many by the author that enhance its importance as a history and guide
