The Modified Nucleosides In Nucleic Acids:

The Modified Nucleosides in Nucleic Acids Ross Hume Hall, 1971-01-01 Modified Nucleosides Piet Herdewijn, 2008-09-08 Edited by one of the main driving forces behind the field's momentous rise in recent years this one stop reference is the first comprehensive resource to integrate recent advances The first part addresses biochemical aspects and applications the second and third parts are devoted to compounds with therapeutic potential with the third part focusing on newly introduced anticancer nucleoside drugs Essential reading for every scientist working in this area *Modified Nucleic Acids in Biology and Medicine* Stefan Jurga, Volker A. Erdmann (Deceased), Jan Barciszewski, 2016-07-29 This volume is comprised of 18 chapters covering various aspects of DNA modification and RNA modified bases It also discusses in detail circular RNA therapeutic oligonucleotides and their different properties The chemical nature of DNA RNA protein and lipids makes these macromolecules easily modifiable but they are also susceptible to damage from both endogenous and exogenous agents Alkylation and oxidation show a potential to disrupt the cellular redox equilibrium and cause cellular damage leading to inflammation and even chronic disease Furthermore DNA damage can drive mutagenesis and the resulting DNA sequence changes can induce carcinogenesis and cancer progression Modified nucleosides can occur as a result of oxidative DNA damage and RNA turnover and are used as markers for various diseases To function properly some RNA needs to be chemically modified post transcriptionally Dysregulation of the RNA modification pattern or of the levels of the enzymes that catalyze these modifications alters RNA functionality and can result in complex phenotypes likely due to defects in protein translation While modifications are best characterized in noncoding ribonucleic acids like tRNA and rRNA coding mRNAs have also been found to contain modified nucleosides This book is a valuable resource not only for graduate students but also researchers in the fields of molecular medicine and molecular biology *Modified Nucleosides and Cancer* G. Nass, 2012-12-06 This book comprises the lectures presented at the workshop Modified Nucleosides and Cancer held from 28 September to 2 October 1981 in Freiburg West Germany The workshop was organized by Gisela Nass and sponsored by the Deutsche Forschungsgemeinschaft The purpose of the workshop was to cover the varied analytical methods for quantitative and qualitative determination of modified nucleosides and their metabolism including biosynthesis all in relation to the function of these compounds in the origin and growth of cancer cells The potential significance of measuring modified nucleosides in body fluids for tumor diagnosis in humans received particular attention Various fields of research which have previously been segregated are thus unified in this volume Emphasis was also placed on the fact that modified nucleosides are constituents of the genetic material the deoxyribonucleic acid on the one hand and of the transfer ribonucleic acids on the other hand with the latter macromolecules participating not only in the translation of genetic information into protein but also in many regulatory processes in all single and multicellular organisms including man **Modified Nucleosides in Cancer and Normal Metabolism - Methods and Applications** , 1990-05-02 Modified Nucleosides in Cancer and Normal
