J. Resler, 2016 Ever wanted to take apart the microwave to see how it works Crack open your computer and peek inside Intrigued by how things work So are we That s why we re dissecting all kinds of things from rubber erasers to tractor beams Read along as National Geographic Kids unplugs unravels and reveals how things do what they do Complete with Tales from the Lab true stories biographies of real scientists and engineers exciting diagrams and illustrations accessible explanations trivia and fun features this cool book explains it all **Celestial Messages** Suroso Mun, 2012-07 Everything in this world is born out of the same root and has a similar origin Though things look all different they are actually the same like the leaves on the left and those on the right If you always look at things with a humble mind and examine them closely you will get to know that there is nothing irrelevant to the Universe Begin every day with gratitude and end every day with gratitude and lead a pleasant and leisurely life Your life is the only thing that you can create The life that you create changes you and your change will change you even more Thus how can you live your life unpleasantly [The Nature of Order, Book One: The Phenomenon of Life](#) Christopher Alexander, 2020-03-30 Christopher Alexander s series of ground breaking books including A Pattern Language and The Timeless Way of Building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in The Nature of Order Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities In The Phenomenon of Life the first volume in this four volume masterwork Alexander proposes a scientific view of the world in which all space matter has perceptible degrees of life and sets this understanding of order as an intellectual basis for a new architecture With this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region He introduces the concept of living structure basing it upon his theories of centers and of wholeness and defines the fifteen properties from which according t his observations all wholeness is built Alexander argues that living structure is at once both personal and structural Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific though from 1600 to 2000 have finally been united *Distant Memory* Alton L. Gansky, 2000-02-15 SHE COULDN T REMEMBER HER NAME HER ADDRESS HER FAMILY NOT EVEN WHY SOMEONE WANTED HER DEAD WHO WAS SHE SHE HAD LOST HER WALLET HER IDENTITY EVERYTHING EXCEPT THE CLOTHES ON HER BACK AND HER LIFE She awoke in a room
