Thinking About Evolution

Clifford Lane

Thinking About Evolution:

Thinking about Evolution Rama S. Singh, 2001 Originally published in 2001 this is the second of two volumes published by Cambridge University Press in honour of Richard Lewontin This second volume of essays honours the philosophical historical and political dimensions of his work It is fitting that the volume covers such a wide range of perspectives on modern biology given the range of Lewontin's own contributions He is not just a very successful practitioner of evolutionary genetics but a rigorous critic of the practices of genetics and evolutionary biology and an articulate analyst of the social political and economic contexts and consequences of genetic and evolutionary research The volume begins with an essay by Lewontin on Natural History and Formalism in Evolutionary Genetics and includes contributions by former students post docs colleagues and collaborators which cover issues ranging from the history and conceptual foundations of evolutionary biology and genetics to the implications of human genetic diversity

How to Think about Evolution & Other Bible-science Controversies Lloy Duane Thurman, 1978 When it comes to the Bible and evolution Christians get upset Duane Thurman clears the emotional fog from the evolution controversy and exposes the hidden sources of conflict

Evolution for Everyone David Sloan Wilson, 2007-12-26 With stories that entertain as much as they inform renowned evolutionist David Sloan Wilson outlines the basic principles of evolution and shows how when properly understood they can illuminate the length and breadth of creation from the origin of life to the nature of religion What is the biological reason for gossip For laughter For the creation of art Why do dogs have curly tails What can microbes tell us about morality These and many other questions are tackled by Wilson in this witty and groundbreaking new book Now everyone can move beyond the sterile debates about creationism and intelligent design to share Darwin's panoramic view of animal and human life seamlessly connected to each other Evolution as Wilson explains is not just about dinosaurs and human origins but about why all species behave as they do from beetles that devour their own young to bees that function as a collective brain to dogs that are smarter in some respects than our closest ape relatives And basic evolutionary principles are also the foundation for humanity's capacity for symbolic thought culture and morality In example after example Wilson sheds new light on Darwin's grand theory and how it can be applied to daily life By turns thoughtful provocative and daringly funny *Evolution for Everyone* addresses some of the deepest philosophical and social issues of this or any age In helping us come to a deeper understanding of human beings and our place in the world it might also help us to improve that world
