**The 7 Laws of Magical Thinking** Matthew Hutson, 2012-04-12 In this witty and perceptive debut a former editor at Psychology Today shows us how magical thinking makes life worth living Psychologists have documented a litany of cognitive biases misperceptions of the world and explained their positive functions Now Matthew Hutson shows us that even the most hardcore skeptic indulges in magical thinking all the time and it's crucial to our survival Drawing on evolution cognitive science and neuroscience Hutson shows us that magical thinking has been so useful to us that it's hardwired into our brains It encourages us to think that we actually have free will It helps make us believe that we have an underlying purpose in the world It can even protect us from the paralyzing awareness of our own mortality In other words magical thinking is a completely irrational way of making our lives make rational sense With wonderfully entertaining stories personal reflections and sharp observations Hutson reveals our deepest fears and longings He also assures us that it is no accident his surname contains so many of the same letters as this imprint
