Writing Systems:

Writing Systems Florian Coulmas, 2003 During its long history the problem of reducing language to writing and conversely that of interpreting written signs as language has found a variety of solutions which still exist in the form of different writing systems Written by a leading expert this new textbook provides an accessible introduction to the major writing systems of the world from cuneiform to English spelling Florian Coulmas presents detailed descriptions of the world's writing systems and explains their structural complexities as well as the intricate relationship between written and spoken language The book also provides a clear and engaging account of the history of writing and its consequences for human thought and literate society This illustrated textbook includes questions for discussion at the end of each chapter and an up to date explanation of theoretical issues Clearly organised and engagingly written it is the ideal textbook for use on courses on writing systems

Second Language Writing Systems Vivian Cook, Benedetta Bassetti, 2005-05-23 Second Language Writing Systems looks at how people learn and use a second language writing system arguing that they are affected by characteristics of the first and second writing systems to a certain extent independently of the languages involved This book presents for the first time the effects of writing systems on language reading and writing and on language awareness and provides a new platform for discussing bilingualism biliteracy and writing systems The approach is interdisciplinary with contributions not only from applied linguists and psychologists but also corpus linguists educators and phoneticians A variety of topics are covered from handwriting to spelling word recognition to the mental lexicon and language textbooks to metalinguistic awareness Though most of the studies concern adult L2 learners and users other populations covered include minority children immersion students and bilingual children While the emphasis is on English as the L2 writing system many other writing systems are analysed as L1 or L2 Arabic Chinese Dutch Gujarati Indonesian Irish Italian and Japanese Approaches that are represented include contrastive analysis transfer poststructuralism connectionism and corpus analysis The readership is SLA and bilingualism researchers students and teachers around the world language teachers will also find much food for thought

A Computational Theory of Writing Systems Richard William Sproat, 2000-07-03 This book develops a formal computational theory of writing systems It offers specific proposals about the linguistic objects that are represented by orthographic elements what levels of linguistic representation are involved and how they may differ across writing systems and what formal constraints hold of the mapping relation between linguistic and orthographic elements Based on the insights gained Sproat then proposes a taxonomy of writing systems The treatment of theoretical linguistic issues and their computational implementation is complemented with discussion of empirical psycholinguistic work on reading and its relevance for the computational model developed here Throughout the model is illustrated with a number of detailed case studies of writing systems around the world This book will be of interest to students and researchers in a variety of fields including theoretical and computational linguistics the psycholinguistics of reading and writing and speech

technology Writing Systems Henry Rogers,2005 Accessibly written Writing Systems A Linguistic Approach provides detailed coverage of all major writing systems of historical or structural significance with thorough discussion of structure history and social context as well as important theoretical issues The book examines systems as diverse as Chinese Greek and Maya and each writing system is presented in the light of four major aspects of writing history and development internal structure the relationship of writing and language and sociolinguistic factors The volume is extensively illustrated and the glossary of technical terms exercises and further reading suggestions that accompany each chapter make Writing Systems a valuable resource for students in linguistics and anthropology Visible Speech John DeFrancis,1989 Visible Speech is an attempt to set the record straight about the nature of writing John DeFrancis a noted specialist in the Chinese language shows that writing can be based only upon a sound system and not upon any other linguistic level He corrects the erroneous views of Chinese writing as pictographic ideographic logographic or morphemic and defends his conclusion that because of these misrepresentations the nature of all writing continues to be misunderstood Using the writing systems of Sumerian Egyptian Arabic Japanese Korean Greek Mayan and English among others to illustrate his points Dr DeFrancis stresses their basic identity as representatives of visible speech while noting their secondary differences as manifested in their diverse script forms He proposes a new classification of writing systems based on this theme of diversity and oneness and makes an impassioned case for the essential phonetic component of all writing This book reflects the author's sound scholarship and novel insights which place it in the forefront with such classics on writing as those by Gelb Dinger Cohen Frier and Jensen The readable style aims at a general audience interested in understanding the nature of the symbols that first strike the eye while the academic research involved makes it an indispensable work for scholars in the many fields related to language and linguistics **Advances in the Creation and Revision of Writing Systems** Joshua A. Writing Systems of the World Florian Coulmas, 1991-01-08 This book is an account of the writing systems of the world from earliest times to the present Its aim is to explore the complex ways in which writing systems relate to the language they depict Writing Coulmas contends is not only the guide or garment of spoken language but has a deep and lasting effect on the development of language itself His study takes in Egyptian hieroglyphics and the cuneiform system of the ancient Near East he describes Chinese writing discussing why an apparently cumbersome system has been used continuously for more than 3 000 years he ranges across the writing systems of western Asia and the Middle East the Indian families and the various alphabetic traditions which had its origins in the multifarious world of Semitic writing and came to full bloom in pre Classical Greece
