Are We There Yet? The Search for a Theory of Everything Moataz H. Emam, 2011-03-25 We live in exciting times the frontiers of physics have been pushed to unprecedented horizons the Holy Grail of fundamental physics research today is to find and describe a theory that explains at least in principle all physical phenomena which in turns explains chemistry biology and other material sciences This however is not without controversy the current candidate for such a theory is known as string or superstring theory It suffers from the problem of being a purely mathematical science with no experimental backing and belief in it has been criticized as bordering on faith as opposed to scientific scrutiny On the other hand the recent switching on of our most advanced experimental tool the Large Hadron Collider in Switzerland gives new hope in our search for clues as to what the universe is made of on a fundamental level What happened exactly on or even before the Big Bang Where are we coming from and where are we going Questions that have never been addressed before by physicists the game is afoot and the search is on This book contains articles by leading physicists describing the current situation Among them are proponents as well as opponents of string theory proponents of other ideas and experimentalists
