New Approaches for Sustainable & Resilient Processes and Products of Social Housing Development in the Arabian Gulf Countries Khaled Galal Ahmed, Mohamed H. Elnabawi Mahgoub, Lindita Bande, Martin Scoppa, 2023-10-16 Social housing has been a forefront research topic especially from its economic and socio cultural factors The nature of social housing in the Arabian Gulf Countries has been distinctive in its approach with usually generous areas and urban sprawl designs Recently most of these Arabian Gulf Countries have gone through profound transformation in their social and housing paradigms influenced by their sustainability adopted agendas Still scholarly documentation and analysis of the processes and products of these transformed paradigms are largely missing or at least fragmented So there is a desperate need to boost research work in this field as related to each city country in this region with largely expected mutual effects that these experiences might have on each other and on the global debate about sustainable and resilient social housing as a whole **Renewable**

Energy Systems Sanjay Kumar, Nikita Gupta, Sandeep Kumar, Subho Upadhyay, 2022-09-29 RENEWABLE ENERGY SYSTEMS Providing updated and state of the art coverage of a rapidly changing science this groundbreaking new volume presents the latest technologies processes and equipment in renewable energy systems for practical applications This groundbreaking new volume examines recent advances in the area of renewable energy systems including modeling and optimization using different methods like GAMS HOMER AI techniques and MATLAB Simulink and others Covering extensively diverse topics ranging from solar radiation prediction model to improving solar power output by studying the tilt and orientation angle of rooftop mounted systems a multitude of practical applications are covered offering solutions to everyday problems as well as the theory and concepts behind the technology Among these applications are increasing the longevity of PV by studying its degradation and its use by operating an electrolyzer for hydrogen production using biodiesel as a green energy resource as an alternative to diesel fuel concentrating the black liquor based biomass as a source from multiple stage evaporator along with thermo vapour compressor and the real time problems of modeling and optimizing renewable energy sources Written and edited by a global team of experts this groundbreaking new volume from Scrivener Publishing presents recent advances in the study of renewable energy systems across a variety of fields and sources Valuable as a learning tool for beginners in this area as well as a daily reference for engineers and scientists working in these areas this is a must have for any library *Proceedings of the International Conference on Law, Economic & Good Governance (IC-LAW 2023)* Abdul Kadir Jaelani, Irwansyah Irwansyah, Fokke Fernhout, Agus Raharjo, Mohd Rizal Palil, Hilaire Tegan, Okid Parama Astirin, Sutarno Sutarno, Venty Suryanti, Pranoto Pranoto, Robbi Rahim, 2024-02-21 This is an open access book The position of Indonesia and most countries in IMF calculations facing the same challenges Each country requires the legal instruments of a good and reliable system of Government to guards against the worst possible economic turmoil Good governance is an insistence of the constitution in the economic Article 33 paragraph 5 subsequently published Constitution

Number 30 Year of 2014 on Government Administration contains 17 principles of a good governance One of the important points of the principle is a government without corruption and manipulation of policy concepts in order to provide access to consolidation in politics and economy The latest Transparency International report for 2023 shows that Indonesia s corruption perception index was recorded at 34 points on a scale of 0 100 in 2022 This is a 4 point decrease from the previous year This decline in the CPI also brought down the ranking of Indonesia s CPI globally It was noted that Indonesia s CPI in 2022 ranked 110th In the previous year Indonesia s CPI was ranked 96th globally Good Governance is all aspects related to the control and supervision of the power of the Government in carrying out its functions through formal and informal institutions To implement the principles of Good Governance and Clean Government the Government must implement the principles of accountability and efficient resource management Good and clean governance will contribute to economic growth and economic growth will have an impact on human development During the last decades of 20th century the needs for a good governance has given some impacts and became a recurring theme in literature related to human development The intervention of government or the quality of government become crucially important in relation to the high achievement of human development Whereas an effort in improving society s welfare is through economic development One of dominant aspects in economic development is through legal development Good law or policy in such country will have some impacts to the existence of good economic growth because supremacy of law is one aspect of a good governance Law supremacy is an important institution which is related to economic growth because rule of law ensures personal safety property rights unbiased contract enforcement stability of politics freedom of speech and control of corruption According to those various issues and debates on economic legal development and good governance then the Doctoral Program of the Faculty of Law Sebelas Maret University needs to hold an international conference as a place in exchanging some academic ideas in order to contributes to those legal issues with a theme INTERNATIONAL CONFERENCE ON LAW ECONOMICS AND GOOD GOVERNANCE

Renewable Energy and Green Technology Narendra Kumar, Hukum Singh, Amit Kumar, 2021-12-09 Renewable Energy and Green Technology Principles and Practices is based on the present need to understand the principles and utility of renewable energy and green technology to minimize dependency on fossil fuels in global development Renewable energy is the best and cheapest source of energy as an alternate resource There is massive potential for renewable energy globally including in India The efficient utilization of renewable energy resources could minimize the impact of climate change globally Generally renewable energy is generated from essentially inexhaustible sources including wind power solar power geothermal energy tidal energy biomass energy and other sources Hence encouraging renewable energy use could save our tomorrow from the climate change perspective and in terms of sustainable

food production This book promotes the exchange of ideas policy formulation and collective action to ensure a smooth transition to renewable energy It describes the technological interventions for reducing environmental and economic damage resulting from the use of conventional energy sources In this book the focus is on utilizing various renewable energy sources in diverse sectors It also elaborates the descriptive methodology of different renewable energies accompanied by figures and tables It provides information on biogas energy plants gasifier technologies and hydropower technologies among others along with their applications Further it delves into energy concepts and details significant advantages of the energy resources for sustaining the future world Lastly this book will provide instant access to comprehensive cutting edge knowledge making it possible for academicians and researchers to utilize this ever growing wealth of information Key features Emphasizes the understanding of the principles and utility of renewable energy and green technology to minimize dependency on fossil fuels in the era of global development Focuses on recent trends in renewable energy with principles and practices in relation to climate change Highlights advanced approaches for sustainable use of renewable energy sources Illustrates the methodology for various aspects of renewable energy with figures and charts Discusses the green technology usages of the agriculture and forestry sectors Provides comprehensive cutting edge information for policymakers in the field of renewable energy

Power System Economic and Market Operations Jin Zhong,2018-01-12 Power system operation is one of the important issues in the power industry The book aims to provide readers with the methods and algorithms to save the total cost in electricity generation and transmission It begins with traditional power systems and builds into the fundamentals of power system operation economic dispatch ED optimal power flow OPF and unit commitment UC The book covers electricity pricing mechanisms such as nodal pricing and zonal pricing based on Security Constrained ED SCED or SCUC The operation of energy market and ancillary service market are also explored It covers a wide range of interesting topics which could be very useful for understanding the main phenomena ruling power systems economy such as Optimal Power Flow analysis and unit Commitments It addresses topics widely treated in the literature hence it is important to outline its distinctive features compared to other similar books The book is well structured and well balanced Alfredo Vaccaro University of Sannio Italy

New Renewable Energy Resources World Energy Council,1994 Renewable energy is seen by some as the only hope for the survival of the planet yet by others it is viewed as a marginal resource with limited potential All too often however the facts behind the role that renewable energy can and will play in the future global energy scene are disguised or ignored as rival camps distort the evidence to suit their own objectives

Application of Nature Based Algorithm in Natural Resource Management Mrinmoy Majumder,Rabindra Nath Barman,2013-05-23 This book highlights the application of nature based algorithms in natural resource management The book includes the methodologies to apply what natural flora or fauna do to optimize their survival The same technique was used to optimize renewable energy generation from water resources maximization of profit from crop harvesting forest resource management and decision

making studies These studies can be used as an example for finding solutions of the other maximization or minimization problems which are common in natural resource management

The Green New Deal Jeremy Rifkin,2019-09-10 New York Times Bestselling Author The renowned economic theorist explains how America can and must create a post fossil fuel culture to survive We can t keep doing business as usual Facing a global emergency a younger generation has spearheaded a national conversation around a Green New Deal a movement with the potential to revolutionize society But while the Green New Deal has become a lightning rod in the political sphere there is a parallel movement emerging within the business community that will shake the very foundation of the global economy in coming years Key sectors of the economy are fast decoupling from fossil fuels in favor of ever cheaper solar and wind energies and the new business opportunities and employment that accompany them New studies are sounding the alarm that trillions of dollars in stranded fossil fuel assets could create a carbon bubble likely to burst by 2028 causing the collapse of the fossil fuel civilization The marketplace is speaking and governments will need to adapt if they are to survive and prosper In The Green New Deal Jeremy Rifkin delivers the political narrative and economic plan for the Green New Deal that we need at this critical moment in history The concurrence of a stranded fossil fuel assets bubble and a green political vision opens up the possibility of a massive shift to a post carbon ecological era in time to prevent a temperature rise that will tip us over the edge into runaway climate change With twenty five years of experience implementing Green New Deal style transitions for both the European Union and the People s Republic of China Rifkin offers his vision for how to transform the global economy and save life on Earth The Green New Deal takes a stance quite different from that of typical Green New Deal supporters he s interested in building factories farms and vehicles in a fossil free world asserting that the Green New Deal is all about infrastructure The New York Times Book Review An urgent endorsement of efforts to remake a doomed fossil fuel economy before it s too late Kirkus Reviews
