*The Human Machine* Arnold Bennett, 2015-11-26 There are men who are capable of loving a machine more deeply than they can love a woman They are among the happiest men on earth This is not a sneer meanly shot from cover at women It is simply a statement of notorious fact Men who worry themselves to distraction over the perfecting of a machine are indubitably blessed beyond their kind Most of us have known such men Yesterday they were constructing motorcars But to day aeroplanes are in the air or at any rate they ought to be according to the inventors Watch the inventors Invention is not usually their principal business They must invent in their spare time They must invent before breakfast invent in the Strand between Lyons s and the office invent after dinner invent on Sundays See with what ardour they rush home of a night See how they seize a half holiday like hungry dogs a bone They don t want golf bridge limericks novels illustrated magazines clubs whisky starting prices hints about neckties political meetings yarns comic songs anturic salts nor the smiles that are situate between a gay corsage and a picture hat They never wonder at a loss what they will do next Their evenings never drag are always too short You may indeed catch them at twelve o clock at night on the flat of their backs but not in bed No in a shed under a machine holding a candle whose paths drop fatness up to the connecting rod that is strained or the wheel that is out of centre They are continually interested nay enthralled They have a machine and they are perfecting it They get one part right and then another goes wrong and they get that right and then another goes wrong and so on When they are quite sure they have reached perfection forth issues the machine out of the shed and in five minutes is smashed up together with a limb or so of the inventors just because they had been quite sure too soon Then the whole business starts again They do not give up that particular wreck was of course due to a mere oversight the whole business starts again For they have glimpsed perfection they have the gleam of perfection in their souls Thus their lives run away They will never fly you remark cynically Well if they don t Besides what about Wright With all your cynicism have you never envied

*The Human Machine* David Monteverde,2021-05-06 The human body is a machine This machine is composed of organs which in turn are made of tissues cells molecules atoms and subatomic particles And like any physical entity the human body depends on physical laws The laws of physics are our basic tool for understanding the functioning of any machine including biological organisms Biology is after all applied chemistry and chemistry is really just applied physics But physical laws by themselves are not sufficient to characterize physical mechanisms Interaction between elements is of fundamental importance and a machine is generally better described as a system The complex machine that we know as the human body is perhaps optimally studied under the umbrella of systems theory
