The Job:

Mastering the Job Search Process in Recreation and Leisure Services Craig Ross, Brent Beggs, Sarah Young, 2011-04-18 Mastering the Job Search Process in Recreation and Leisure Services Second Edition is a practical guide full of tools and advice for recreation and leisure service professionals This book simplifies the process of securing a job in recreation and leisure service by explaining every step from both an employer's and applicant's point of view Based on years of experience in the hiring process this book reflects research conducted with over one thousand recreation and leisure services practitioners involved in the job search process The book includes their advice as well as secrets to success

The End of the Job Description Tim Baker, 2016-04-29 That's not my job If you don't want your employees to say that why do you start your relationship by giving them a narrow task and competency focused description of their job We need people to fulfil many different roles at work yes the need to do their job but they also need to contribute positive energy collaborate and take personal responsibility for innovation and personal development How do they fit into a traditional job description It is futile persevering with the job description borne out of the scientific management movement one hundred years ago The world of work is vastly different to the assembly lines of the Ford Motor Company of the early twentieth century Building on the phenomenal success of *The End of the Performance Review* Baker examines four essential Non Job roles that all employees must fulfil and shows how to create meaningful role descriptions that can help you recruit better people and enable them to deliver better results

Best Practices for Managing IBM i Jobs and Output (and a few other special tips) Hernando Bedoya, Dawn May, Angela Newton, Mike Rusell, Dan Tarara, Kevin Vette, IBM Redbooks, 2008-09-18 Jobs and spooled output consume system resources mainly the CPU used to create and manage them and the storage to contain them Typically in most environments you can manage resources that jobs and spooled files consume successfully However on the largest systems with the largest numbers of jobs and very large numbers of spooled files you can encounter limits Too many jobs can fill up the job table or too many spooled files can consume all the system's storage Having a large number of jobs and spooled files in the system can contribute to potentially long IPLs for unexpected outages Having a very large number of spooled files on a single output queue can result in lock contention This IBM Redpaper publication describes best practices and recommendations for managing jobs and spooled output on IBM i It provides an overview of the various controls within the IBM i operating system that you can configure to adjust the limits for spooled output and jobs It also provides recommendations for setting these values We do not explain in detail each of the configuration controls that we discuss in this paper Rather if you need additional information regarding the topics that we discuss see the IBM i 6.1 Information Center at <http://publib.boulder.ibm.com/series>
