Brown,2007-06-04 These writings show the unconscious priorities that the limbic system of the mind operates with proportion to the greater meanings over time to a person The unconscious conscious processes are complex when relating to reproduction What is documented here is an example of how every day our unconscious reprograms our conscious mind with what we are going to think our life is about Or translated into why the accounting of this book seems obsessed with love it defines a function obliquely or marriage as a practice of unconditional love then parental love adjacent to romantic love creating a supporting instinctual structure manipulated to serve us by us throughout our lives
