The Home Cook Book, 1900 [The Home-cooking Cookbook](#), 1972 **Manly Meals and Mom's Home Cooking** Jessamyn Neuhaus, 2003-07-28 From the first edition of *The Fannie Farmer Cookbook* to the latest works by today s celebrity chefs cookbooks reflect more than just passing culinary fads As historical artifacts they offer a unique perspective on the cultures that produced them In *Manly Meals and Mom s Home Cooking* Jessamyn Neuhaus offers a perceptive and piquant analysis of the tone and content of American cookbooks published between the 1790s and the 1960s adroitly uncovering the cultural assumptions and anxieties particularly about women and domesticity they contain Neuhaus s in depth survey of these cookbooks questions the supposedly straightforward lessons about food preparation they imparted While she finds that cookbooks aimed to make readers mainly white middle class women into effective modern age homemakers who saw joy not drudgery in their domestic

tasks she notes that the phenomenal popularity of Peg Bracken's 1960 cookbook *The I Hate to Cook Book* attests to the limitations of this kind of indoctrination. At the same time she explores the proliferation of bachelor cookbooks aimed at the man in the kitchen and the biases they display about male and female abilities, tastes, and responsibilities. Neuhaus also addresses the impact of World War II rationing on homefront cuisine, the introduction of new culinary technologies, gourmet sensibilities, and ethnic foods into American kitchens, and developments in the cookbook industry since the 1960s. More than a history of the cookbook, *Manly Meals and Mom's Home Cooking* provides an absorbing and enlightening account of gender and food in modern America.

Originally Published for the Benefit of the Home for the Friendless Chicago. Good diet with wisdom best comforteth man. Thomas Tusser. Sir Thomas Browne has quaintly observed that at some time or other we have all been on our own trenchers, and if the present rendering of science be true in the relation of matter to mind, it may be a subject of no slight importance: how the psychological units that go to build up our brain and nerve forces are set before us, and how our dinners are cooked, may be a more momentous question than who is to be the next President. With all supplied advice upon this subject, there are two qualities which have been seldom attained in any treatise hitherto published upon this science: viz. the art of uniting plain, simple, and practical methods in the preparation of food, with that finish and perfection of detail, and that delicate blending of material, which are products of a refined and exquisite perception, and a delicate and
